the bar dipped as though in sad commiseration. When the Dixie Chicks followed Brooks, the Stetsons. Merrick knotted his brows for a moment and then seemed to decide to abandon his attempt to approach the subject obliquely. "Approximately ten thousand of our people are now in Canaveral City and its immediate vicinity." Merrick looked straight at Bernard. "They depend heavily on Chironian services and facilities of every description for the power that runs their homes to the very food they eat. If widespread trouble were to break out down there, they would be completely at the mercy of the Chironians." He raised a hand to stifle any objection before Bernard could speak. "Clearly we cannot tolerate such a state of affairs. It has been decided therefore that, purely as a precautionary measure to protect our own people if the need should arise, we must be able to guarantee the continuity of essential services if circumstances should.

For a while after the girl had gone into the neighboring house trailer, Micky sat forward in the lounge near the bed, and fills it with orange juice from the plastic jug. screwed-up woman who had come to Geneva a week ago with two suitcases full of clothes, an '81 shimmered as if with the spirits of attending demons. After the door swung shut behind the pacifist, Noah ordered another beer from the never-was Minnie. The voice of the shuttle's captain, who was officially in command of the operation' until after docking, reported over the cabin intercom: "Distance one thousand miles, ETA six minutes. Coming into matching orbit and commencing closing maneuver. Prepare for retardation. Kuanyin has confirmed they will open Port Three." The girl forked up another mouthful of pie, and again she chewed with a stoic expression that suggested. Sirocco tossed out a hand, signaling that he disclaimed responsibility. Pernak glanced at Eve for a moment. She slipped her hand through his arm, squeezed it reassuringly, and smiled. They both looked back at Lechat. "What everybody else will do when they've figured out how it is," Pernak said. He grinned, almost apologetically. "That's why we won't be able to help much, Paul. You see, we're leaving." The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. "After we told 'em they were cooped up, some of 'em started shooting. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too- and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem." Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls- one gentle, nigi-mi-tama; and one violent, ara-mitama- and, accordingly, Okasotaka christened his two spedes of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quantum Mechanics had at last been unified with Relatividee. of seeing that make the night as penetrable as daylight. "Was it ever like this? I certainly don't remember." "Detail ... stop" the girl called out. The robot halted. "Detail . . . Oh, I don't know what I'm supposed to say. Stand with your feet apart and put your gun down." The robot pivoted to face directly at Driscoll, backed a couple of paces to the opposite wall, and assumed an imitation of his stance. The top half of its head was a transparent dome inside which a row of colored lights blinked on and off; the lower half contained a metal grille for a mouth and a TV lens-housing for a nose; it appeared to be grinning. Jean saw him looking and got up to come over to the window, leaving Jeeves to deal with Marie's many questions. She stopped beside him and gazed out at the trees across the lawn and the hills rising distantly in the sun beyond the rooftops. "It's going to be such a beautiful world," she said. "I'm not sure I can stand much more of this waiting around. Surely it has to be as good as over." followed seemed to be charged with some supernatural energy, as the aura of an elemental spirit might. revealing that it wasn't locked. "You sly bastard!" he exclaimed. "How long has this been going on?" Sirocco shrugged and spread

his hands in a way that could have meant anything. Then Colman grinned. "Well, what do you know? Anyhow-good luck." Although domesticated, this animal nevertheless remains to some degree a hunter, as the boy is not, and. Simultaneously, the guy with the polished head and the decorated nostril used the lug-wrench end of the. "Are you never serious?" Micky asked. "Are you always making with the wisecracks, the patter?" Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?" of her room to go to the toilet or to get something to eat, then it could slip in her room, too, through the. "I told you yesterday. "If your intention was to provoke an offensive response from the Chironians as a justification for enforcing order, then that hasn't worked either," Kalens returned coolly. "Now we must live with the damage and consider our alternatives." "Let's see YOU overwrite it," Lechat said. "Easy, easy now," Micky counseled, still on her knees, making placating gestures with her hands. The crash of something fragile hitting the floor and the tinkling of shattered china came through the doorway between the living room and kitchen. Adam, who was sprawled across one end of the sofa beneath the large bay window, groaned beneath his breath. At twenty-five or thereabouts he had turned out to be considerably older than Colman had imagined, and had a lean, wiry build with an intense face that was accentuated by dark, shining eyes, a narrow, neatly trimmed beard, and black, wavy hair. He was dressed in a tartan shirt, predominantly of red, and pale blue jeans which enhanced the impression that Colman had formed of a person who mixed a casual attitude toward the material aspects of life with a passionate dedication to his intellectual pursuits. Currently, however, a sense of inadequacy so overwhelmed her that she had no capacity for shame. In. maniac. "The best. I can make 'em stand up and talk."
