The display showed the target command bunker at the bottom of the gorge, known enemy weapons emplacements as computed from backplots of radar-tracked shell trajectories, and the locations of observation and fire command posts from source analysis triangulations of stray reflections from control lasers. On it the cool water of the stream and its tributaries stood out as black lines forking like twigs; the rock crags and boulders were shades of blue; living vegetation varied from rust brown on the hills to deep red where it crowded together along the lower slopes of the gorge; and shell and bomb scars glowed from dull orange to yellow depending on how recently the explosions had occurred..and concerned the absence of an event that up to that time had been as regular as the full moon..Scott

Zorphwar runs at A-1 priority on our machine, which means that any other use of the machine is halted while Zorphwar computations are completed. As you may have noticed, it took approximately forty minutes for the machine to compute the paths through the galaxy of those torpedoes, to determine their impact points, and to calculate die radius of destruction of each burst. Normally such overloads are handled by adjusting the work load in the Computer Center. However, at three thirty yesterday, the Center was in the midst of printing the paychecks for the entire Computer Products Division. The little delay our game occasioned upset the very tight schedule for that operation. As a result, all checks from R through Z were not printed on time and failed to make the courier flight to the West Coast That is the reason your paycheck was not delivered to you today. Regrettably, it is also the reason that Division President Tailing and Corporation Comptroller Westland were not paid this week. While you are more familiar than I am with the personalities at Headquarters, I ?aspect that both of these gentlemen like to receive their paychecks. I trust that, if any investigations come out of this little incident, you will do your best to emphasize the fact that the Zorphwar program has already been modified to permit the launching of no more than tea doomsday torpedoes in one attack. Thus, this particular problem on never occur again..And so passed the day..So as a public service (and to save you from the embarrassing experience of talking about the 1969 The Pterodactyl That Ate Pet-rograd when someone else is discussing the classic 1932 version), let's sort out some of these.
