seasons the night with enchantment, the landlocked Western equivalent of a siren's irresistible song. Bernard gave a pained smile. "It sounds good," he agreed. "But the Directorate might have a few things to say." "You know what he's got that's better than money?" playful, she bounds forward, snatches a muzzelful of plaid, and jerks the stranger off his feet. The man. "Someone you how?" Colman asked. Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said. It wasn't a moment to be keeping up pretenses. Colman's frown deepened. "What about her? Is she okay?" "Very probably it was," Kath replied. "The man you saw was probably having a relaxing day or two keeping his hand in. It's nice to have machines around to take care of things when they become chores." "My orders require me to take you three back with us. It would make things a lot easier for everybody if you complied. I'm sorry, but I don't have any choice." "Probably not much of anything," Leilani said, without a pause. "Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it." Lechat waited for the noise to die away and managed to bring his feelings under control sufficiently to muster a semblance of dignity appropriate to the moment But simplicity and brevity were appropriate too. "I am honored and privileged by this appointment, and I will dedicate myself for the duration of my term to serving the best interests of our people to the best of my ability," he announced, "in accordance with that promise, my first official act is to restore the full powers of Congress as previously ~suspended, and my second is to declare the state of emergency ended as of this moment," Another round of applause, this time briefer than before, greeted the statement. "Next, I have two proposals to put to the vote of the assembly," Lechat said. "But before I do so, I feel that the Supreme Military Commander of the Mission might wish to speak." He sat down, looked along the dais toward Borftein, and motioned with his hand an invitation for the general to take it from there..spicy cologne, wearing black jeans and a LOVE IS THE ANSWER T-shirt? slipped into the booth..lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high..skids and nearly falls on a cascade of loose shale, thrashes through an unseen cluster of knee-high sage..Along with most of his generation he had been fired by the vision of the New Order America that they were helping to forge from the ashes and ruins of the old. Even stronger than what had gone before, morally and spiritually purer, and confident in the knowledge of its God-ordained mission, it would rise. again as an impregnable sanctuary to preserve the legacy of Western culture from the corrosive flood of heathen decadence and affluent brashness sweeping across the far side of the globe. So the credo' had run. And when the East at last fell apart from its own internal decay, when the illusion of unity that the Arabs were trying to impose on Central Asia was finally exposed, and when the African militancy eventually expired in an orgy of internecine squabbling, the American New Order would reabsorb temporarily estranged Europe, and prevail. That had been the quest..new species of human beings crossed with crocodiles, and twelve percent would have no opinion." flash again, as though a vehicle this enormous could not be located at night without identifying. GENERAL JOHANNES BORFTEIN'S simple and practical philosophy of life was that everything comes to him who goes out and looks for it, and if need be, takes it. Nobody was going to give anyone anything for nothing, and nobody kept for very long what he neglected to defend. The name of the game was Survival. He hadn't made up the roles; they had been written into Nature long before he existed.. "Pretty good. The axle assembly's finished. You'll have." But how can you be so sure? In her tiny bedroom, Micky kicked off her toe-pinching high heels. She stripped out of her cheap cotton. suddenly found himself holding a half-eaten treat rendered crunchier but inedible by sprinkles of. "Wining, dining, and conspiring--no doubt until the early hours." And then those nearest the tunnel mouth raised their heads and exchanged puzzled looks. On the observation platform Jarvis peered over the parapet, hesitated for a moment, and then straightened up slowly. One by one the soldiers began lowering their weapons, and Jarvis came back down to the floor of the lock.. "She sort of flies a little." Rickster quickly closed his hands. "I'll put her loose." "Not you," she disagreed, as though she knew him well. "Anger's more like it." Jarvis and Chazure glanced at each other. Then Jarvis looked away as a new report came up on one of the screens. "Peterson has come out for Borftein in the Government Center," he muttered over his shoulder. "I guess it's all over in the Columbia District. That has to give them the whole Ring." "It seems to be. How about Borftein and Wellesley?" Behind Sirocco, Celia came through the doorway, escorted by Malloy and Fuller. Stanislaw was behind,

carrying a field compack..Lechat was nodding slowly to himself. "And within hours he'd arranged for somebody to make it look like an outside operation, and by the next morning he'd had the takeover all planned, with the Chironians as a pretext. Everything fits. But who would have done it?"..ankle to above the knee..tried to settle his nerves.."You can't go anywhere with the laws of physics we've got, which is just another way of stating conclusions that are well known. But I think it's a mistake to believe that there just wasn't anything, in the causal sense, before that --if 'before' means anything like what we usually think it means." Pernak sat forward and moistened his lips. "TII give you a loose analogy. Imagine a flame. Let's invent a race of flame-people who live inside it and can describe the processes going on around them in terms of laws of flame physics that they've figured out. Okay?" Jay frowned but nodded. "Suppose they could backtrack with their laws all the way through their history to the instant where the flame first ignited as a pinpoint on the tip of a match or wherever. To them that would be the origin of their universe, wouldn't it." Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old Five minutes later the three Terrans rounded a corner and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soft. The two sergeants waited, and after a few seconds followed Jay's gaze curiously.." ? but a bunch of hooey that maybe has a second and more serious purpose," Micky suggested..A crash rocks the room, rattles cookware. You're as wonderful as I just knew you were when I first saw you..".."I still don't understand the politics behind it all though," he said to the two Chironians who were accompanying him and Jay toward the cafeteria in the Administration Building in front of the main reactor site, where they were due to have lunch. One of them was a young Polynesian named Nanook, who worked with control instrumentation; the other was a slightly younger, pale-faced blonde called Juanita, who dealt with statistics and forecasts and seemed to be more involved with the economic side of the business. Kath herself had taken her leave earlier, explaining that she was expecting another party of visitors. Bernard spread his hands in an imploring gesture. "I mean... who owns the place? Who decides the policies for running it?"..Adam had not seemed especially surprised when Hanlon expressed reservations about the wisdom of such an attitude, and had replied to the effect that on Chiron personal affairs were considered personal business. Some couples might choose to remain exclusively committed to each other and their family, others might not, and it wasn't a matter for society or anybody else to comment on. As far as he was concerned, Adam had ~aid, the notion of anybody's presuming to decree moral standards for others and endeavoring to impose them by legislation was "obscene.."..Colman groaned. The target could only be the Kuan- y-~ yin. If the strike succeeded it would leave Sterm in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Sterm and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from..driving machine says, and the dog obligingly swishes his tail, sweeping the pavement on which he sits.."If you've never read Scrooge McDuck comic books, my literary allusion will be lost on you.."..The snake wasn't huge, between two and three feet long, about as thick as a man's index finger, but..Over his glass, Colman watched as three Special Duty troopers made their way to the bar. They stood erect and intimidating in their dark olive uniforms, cap-peaks pulled low over their faces, and surveyed the surroundings over, hard, jutting chins. Nobody met their stares for long before looking away. One of them murmured an order to the bartender, who nodded and quickly set up glasses, then grabbed bottles from the shelf behind. The SD's were the elite of the regular corps, handpicked for being the meanest bastards in the Army and utterly without humor. They reminded Colman of the commando units he had seen in the Transvaal. They provided bodyguards for VIPs on ceremonial occasions--there was hardly any reason apart from tradition in the Mayflower II's environment--and had been formed by Borftein as a crack unit sworn under a special oath of loyalty. Their commanding officer was a general named Stormbel. D Company made jokes about their clockwork precision on parades and the invisible strings that Stormbel used to jerk them around, but not while any of them were within earshot. They called the SD's the Stromboli Division..For a second longer Colman hesitated, and then found himself smiling back at her as the awareness dawned of what the elusive light dancing in her eyes was saying to him--he was a free individual in a free world. And suddenly the barrier crumbled away..laugh that might make this earnest little nurse want to jump off a bridge, so he held it back and simply..had been, it continued to turn, to writhe, to flail at the air. pressure which sucked more people down from the Mayflower II, and manpower shortages soon developed, making it impossible for the ship to sustain its flow of supplies down to the surface. The embarrassed officials in Phoenix were forced to turn to the Chironians for food and other essentials, which they insisted on paying for even though they knew that no reciprocal currency arrangements existed. The Chironians accepted good-humoredly the promissory notes they were offered and carried on as usual, leaving the Terrans to worry about how they would resolve the nonsense of having to pay their Customs dues to themselves..worth it. It's amazing how many causes aren't worth fighting for when you know it's you Who's going to have to do the fighting." He shook his head slowly. She smiled a promise and winked. Just before the picture blanked out, Colman caught a brief close-up glimpse of her shoulder-length auburn hair and finely formed features as she leaned toward the screen to cut the connection..managed to remain upright, lurching all the way to the door, where she clutched at the knob for support..She'd been a frightened, angry, and humiliated girl, panicked into flight. Jay reached Colman at the school that the Army was using as a temporary barracks in Canaveral City, but Colman started to explain that he had set the afternoon aside for other things--in fact he'd intended to find out more about Port Norday from the Chironian computers. However, he changed his plans when Jay mentioned that Kath would be there to see her grandchildren. After all, Colman reasoned, he couldn't have hoped for a better source of information on Port Norday than Kath. As Hanlon was off duty, Colman had invited him along too..It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily..without dog, glides past the distracted hostess..The dog's Hanks shudder, striking sympathetic shivers in the boy.
