"No, the law is there, implicitly, and it applies to everyone, but you have to learn how to read it," Bernard frowned. That hadn't come out the way he had intended. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one.. Good pup. Through the gap between the officers, the diplomats moved forward and came to a halt in reverse order of precedence, black suits immaculate and white shirtfronts spotless, and finally the noble form of Amery Farnhill conveyed itself regally forward to take up its position at their head.. "Maybe you should try looking at it their way," Colman said.. I hung it in the hallway," Veronica said, getting up. She walked ahead and out the door while Mrs. Crayford waddled a few feet behind. In addition to surprise, however, the boy has Old Yeller. And the dog has teeth. Curtis has teeth, too.. "Over two years ago. I was seven going on eight.." "Why?" a girl in a pink jacket asked.. Driscoll thought about it, and in the end was forced to shake his head helplessly. "Not a lot that you'd be interested in, I guess," he confessed.. "We've been having a serious discussion.." "We-we never believed that story," Bernard said weakly.. "Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side.." With a cause, a crusade, a challenge, and a purpose-an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars.. approaching by a different route.. "Well, I'm pleased to hear that at least one Terran thinks so," Bobby said. How can he know? He's never been dead, It was ridiculous.." - out of the way. It was a communication from Leighton Merrick, the Assistant Deputy Director of Engineering in the Mayflower II, routed for comment via Headquarters and Brigade. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the request for transfer filed by Staff Sergeant Colman. "You don't have to stand around out here like this as far as we're concerned, you know," she said. "You can come on inside if you want. How about a coffee, and maybe something to eat?" The faces turned instinctively toward Colman as he rejoined them.."So where do we go from here?" How was the movie'."Birds are something ladybugs worry about, you know."."And-thanks for the valves," Jay said. "They fit perfectly." "How's it coming along?"What had impressed him the most was the way the kids seemed to be involved in everything that was going on just as much as the grown-ups. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who couldn't have been more than twelve probing carefully and with deep frowns of concentration inside the electronics of a piece of equipment that must have cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. Or maybe the Chironians just had good insurance on their equipment..Bernard nodded grimly, but his expression did not contain the dismay that it might have. Evidently he had been half-prepared for the news. "Borftein's been checking on that possibility," he said. "It'll be forty minutes before the Kuan-yin goes behind the rim. "Perhaps playing up things like Chironian stubbornness and irresponsibility would harden up the public image a bit... just in case. We could get them to add a mention or two of signs that the Chironians might have armed themselves and the need to take precautions. It could always be dismissed later as overzealous reporting. Should I whisper in Lewis's ear about it?"."I don't know," Farnhill said.
