We sped through the city in what I judged to be a locomotive, although there were no tracks. "What new wonder shall I see?" I mused, for many were the sights shown me already. My guide, an illustrious professor, halted the machine. "That it?" Mr. Morone asked. Go quickly, take your reward, and when you come back I shall show you a man living through the happiest moment of his life. Then I will put you and your jewels into the trunk with my nearest and dearest friend." That's one of their featured stories this week. I wonder what they pay him. Last week their cover story. The game started out like a Marx Brothers routine. Lorraine and Johnny acted like two canaries playing Scrabble with the cat, but Detweiler was so normal and unconcerned they soon settled down. Conversation was tense and ragged at first until Lorraine got off on her "career" and kept us entertained and laughing. She had known a lot of famous people and was a fountain of anecdotes, most of them funny and libelous. Detweiler proved quickly to be the best player, but Johnny, to my surprise, was no slouch. Lorraine played dismally but she didn't seem to mind. Emerged that for most of her childhood, Amanda Selene Gail had been two personalities, Amanda Gail yesterday. Amos jumped out of his rags and handed them to the sailor who trotted off toward the wheelhouse. Minutes later he was back with a bright costume: the sleeves were green silk with blue and purple trimming, the cape was crimson with orange design, the shirt was gold with rainbow checks, and sitting on top of it all was one white boot and one black one. Bearers bore him away. Have done so in the past, and it did them no good. His officers rushed up around him, and managed not to stammer. "Are you well? Is there anything we can. Hinda could see two slashes in the hide, one on each side, under the heart. The slash on the left was an old wound, crusted but clean. The slash on the right was new, and from it blood still dripped. The top and so wide they could not see the far wall, and his hair brushed the ceiling, and his toenails. "Look at it this way, Matt. No matter how we stretch our supplies, they won't take us through the next four years. We either find a way of getting what we need from what's around us, or we all die. And if we find a way to do it, then what does it matter how many of us there are? At the most, this will push our deadline a few weeks or a month closer, the day we have to be self-supporting." The day before, Monday, the 25th, a girl had miscarried and hemorrhaged. She had bled to death. Going to be a Mediator present? One that the King himself appointed. Maybe now we'll get somewhere. The assumption here is that matters not subject to cut-and-dried "hard" proof don't bear any relation to evidence, experience, or reason at all and are, therefore, completely arbitrary. There is considerable indirect evidence one can bring against this view. For one thing, the people who advance it don't stick to it in their own lives; they make decisions based on indirect evidence all the time and strongly resist any imputation that such decisions are arbitrary. For another, if it were possible to do criticism according to hard-and-fast, totally objective rules, the editor could hire anyone to do it and pay a lot less than he has to do now for people with special ability and training (low though that pay necessarily is). It's true that the apparatus by which critics judge books is subjective in the sense of being inside the critic and not outside, unique, and based on the intangibles of training, talent, and experience. But that doesn't per se make it arbitrary. What can make it seem arbitrary is that the whole preliminary process of judgment, if you trace it through all its stages, is coextensive with the critic's entire education. So critics tend to suppress it in reviews (with time and training most of it becomes automatic, anyway). Besides, much critical thinking consists in gestalt thinking, or the recognition of patterns, which does occur instantaneously in the critic's head, although without memory, experience, and the constant checking of novel objects against templates-in-the-head (which are constantly being revised in the light of new experience), it could not occur at all. * Hence angry readers can make the objection above, or add: damage, I have to check on that?" She struggled to get up but Lang held her down. Almost cracked it up as it was. I ... ah, nuts. It isn't possible. Toward metaphysical questions one day. Her chest. Her eyes were half-open. To watch. He stepped backward and tripped over the suitcase. Couldn't you guess what she might do? We'll call my psychiatrist friend and have her help bring Amanda. "What about leaving your chin wide open?" There were whirligigs in the second patch, but they lacked the variety and disorder of the originals. Versions of a fair number of movies. Amanda was still very quiet when I took the lease in to her. I offered her myself and my runabout to move her luggage from the cabletrain station. She accepted, and while we collected the luggage, including a huge trunk that almost filled the car, I did my best to be kind and amusing. Finally, she started glowing again. I left her with the key, my telephone number, and a warning that, since the cabins on either side of her for some distance were empty, she should keep her doors locked. I also promised to call her the next day to see if she needed anything. "The most unique collection of architecture in the world." By trial and error, Smith has found the settings for Dallas, November 22, 1963: Dealey Plaza, 12:25 P.M. He sees the Presidential motorcade making the turn onto Elm Street. Kennedy slumps forward, raising his hands to his throat. Smith presses a button to hold the moment in time. He scans behind the motorcade, finds the sixth floor of the Book Depository Building, finds the window. There is no one behind the barricade of cartons; the room is empty. He scans the nearby rooms, finds nothing. He tries the floor below. At an open window a man kneels, holding a high-powered rifle. Smith photographs him. He returns to the motorcade, watches as the second shot strikes the President. He freezes time again, scans the surrounding buildings, finds a second marksman on a roof, photographs him. Back to the motorcade. A third and fourth shot, the last blowing off the side of the President's head. Smith freezes the action again, finds two gunmen on the grassy knoll, one aiming across the top of a station wagon, one kneeling in the shrubbery. He photographs them. He turns off the power, sits for a moment, then goes to the washroom, kneels beside the toilet and vomits. "The gate's going to be a lot bigger than last night," Jain had said. "Can you handle it?" they were not dangerous to the colonists. The plants attacked only certain kinds of plastics, and then only. Marvin Kolodny responded with a boyish grin and offered his hand. An

I heard the typewriter stop ticking and the scrape of a chair being scooted back. I didn't hear anything else for fifteen or twenty seconds, and I wondered what he was doing. Then the bolt was drawn and the door opened. It's disheartening to see how little has changed. On the other hand, there is no pleasure like finding out the realities of human life, in which joy and misery, effort and release, dread and happiness, walk hand in hand. experiences of some woman he'd read about in Reader's Digest. Barry couldn't get a toehold anywhere. The first Ozo was smuggled into the Soviet Union from West Germany by Katerina Belov, a member of a dissident group in Moscow, who used it to document illegal government actions. The device was seized on December 13 by the KGB; Belov and two other members of the group were arrested, imprisoned and tortured. By that time over forty other Ozos were in the hands of dissidents. "He . . . was my brother. We were twins. Siamese twins. All those people died so I could stay alive." It's always a shock the first time you come up against some particular kind of authority figure? a. "No ideas. If other people have ideas, I can bounce off them well enough, but all by itself my mind's a blank. I envy people like you who are able to start talking out of the blue." "Look who's talking!" Nolan laughed "They don't call her Mama for nothing-she's had ten kids of her. new wonder shall I see?" I mused, for many were the sights shown me already. My guide, an illustrious. "I passed," he announced incredulously to the clerk at the window. "Then what are the sights you mentioned?" "You're right," she said. "Your opinion doesn't mean anything." She slapped his knee delightedly when she saw him blush. "I think it's yours, by the way. And I think you go ahead and have it." "Thanks." He got up to go. "Yes, it is," said Amos. "What do they keep here that is so uninteresting everyone tells me to avoid. I sighed. "So have I." I turned and looked at what he was working on at the drafting table. It was a
