"Figured it out yet?".Outside, an upwash of urban glow overlaid a yellow stain on the blackness of the lower sky. High.The murmurs from across the street rose suddenly to catcalls and jeers, accompanied by waving fists and the brandishing of sticks that appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly.."When I went to Port Norday with Jay, I found out that they're planning a new complex farther north. They're going to need engineers-fusion engineers. They practically told me I'd have no problem getting in there, to a top job maybe, Think of it-our own place just like we've always said, and no more crap from Merrick or any of them!" Bernard threw his hands high. "I could be me for the first time in my life. . . and so could you, all of us. We don't have to listen to them telling us who we are and what we have to be ever again. Doesn't that.." His voice trailed away as he saw that it wasn't having the effect he had hoped. Jean was backing away through the door, shaking her head in mute protest..Little snot, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands..Speed 300 miles per second; distance to destination, 493 million miles. "Where are you supposed to be? .gunship, surely armed with machine guns, possibly with rockets. The shriek of the engines vibrates. "It's how the Chironians have been working all along," Lechat said. "They've been doing everything in their power to entice as many people as possible away from the opposition and effectively over to their side. Haven't they done it with us? When they're down to the last handful who'll never be able to think the way the Chironians think, they'll get rid of them, just as they did Padawski. That's how their society has always worked. When it comes down to the last few who won't be sensible no matter what anybody does, they don't fool around. And they'll do the same thing with the ship if Sterm makes one threatening move with those weapons up there. I'm convinced of it. The Chironians took out their insurance a long time ago. That would be typical of how they think too." "Never say you don't get anything back for your taxes." Colman was sitting next to her, grinning faintly in the brief glow as one of the others lit a cigarette. But she had gone for so much of the day without speaking that she was unable to answer immediately. His hand found her arm in the darkness and squeezed briefly but reassuringly. "It'll be okay," he murmured. "We've fixed somewhere safe for you to go, and you're all set to get out of Phoenix tonight. I'll be coming with you into Franklin?". The display of tact seemed to do the trick. The Chironian held his eye for a moment longer, and then nodded. "Very well." Inwardly Colman breathed a sigh of relief. The women were evidently willing to allow the man to speak for them too. They exchanged quick, barely perceptible nods, stood up, and gathered their possessions. Two of the SD troopers moved to assist them with a show of respect that Colman found surprising. .behind her like the finished product of a snake-making machine. .Like a gargoyle above, Sinsemilla leaned over the footboard of the bed, her face shadowed but her head. than titillating, and it can only bring this lovely evening to a new low. Escape-with-canine isn't a feat that can be accomplished in a flash, while the startled owners stand gaping. "That's a strange offer," Otto said to Sterm. You seem to entertain a curious notion of logic." .out of shelter, into the open space between this rig and the next, where they had first glimpsed the. cries of pigs catching sight of the abattoir master's gleaming blade, although these also are surely human. .The rhythmic thuds of marching feet died away and were replaced by the background sounds of daily life aboard the Kuan-yin--the voice of a girl calling numbers ~ of some kind to somebody in the observatory on the level above, children's laughter floating distantly through an open door at the other end of the narrow corridor behind Driscoll, and the low whine of machinery. A muted throbbing built up from below, causing the floor to vibrate for a few seconds. "Good thinking. We were starting to talk shop." Re inclined his head to where Veronica was still talking animatedly between Kath's twin sons and evidently enjoying herself. "Somebody seems to be quite a hit over there." something that required no effort, no slightest sacrifice. "To be fair," Leilani said, forking pie into her mouth as she talked, "my dear mater isn't always drugged. Colman sighed. "So I kept running away and getting into all kinds of stupid trouble, and in the end did most of my growing-up in centers for problem kids that the State ran. There had been too much to think about in too little time. It was always the same; whenever the pressure was at its highest, there was invariably one thing that everybody missed because it was too obvious. They had all been so preoccupied with thinking of how to stop Sterm from getting into the Battle Module that none of them had

And her emotional unsteadiness scared her..Howard Kalens, no doubt about it," Bernard Fallows was saying. "If we've only got two years to knock the place .. into shape, he's lust the kind of man we need. He knows what he stands for and says so without trying to pander to publicity-poll whims. And he's got the breeding for the position. You can't make a planetary governor out of any rabble, you how." "Ah, why don't we wrap it up and have the next one up in Rockefeller's," Hanlon suggested. "That was where Sirocco said he was going."..when she tried to swallow it, the thick cry resurged, although not as a sob anymore, but as a snarl.. "They can't get away with that, dear."..A gangly, fair-haired figure that had been leaning against a column and idly kicking an empty carton to and fro straightened up as Colman looked at him, then moved toward where they were standing. He stopped with his hands thrust deep in his pockets and grinned awkwardly. Colman stared at the boy in surprise. It was lay Fallows. "Where do you get this stuff?"..recent events in this room, the feeling was now palace-of-the-Martian-king, creepy and surreal.. "Bad news," Colman hissed through his teeth. "Just keep talking. Don't look round." "How else could it be?" Adam said when Colman asked him about it. "Sure they had to learn how to use a gun. You know what kids are like. The machines couldn't be everywhere all the time. Ask my mother about it, no1 me."..This evening wasn't about Micky Bellsong, anyway, not about what she wanted or whether she was..Stanislau took a long draught from his glass and made a what-the-hell? gesture. "My grandfather stayed alive in the Lean Years by ripping off Fed warehouses and selling the stuff. He could bomb any security routine ever dreamed up. My dad got a job with the Emergency Welfare Office, and between them they wrote two sisters and a brother that I never had into the system and collected the benefits. So life wasn't too bad." He shrugged, almost apologetically. "I guess it got to be kind of a tradition... sort of handed down in the family."..Fierce as she has never been before, Old Yeller lunges toward the woman. Snarling, snapping, foaming..One of the figures was a bearded, dark-haired man whom Colman recognized as Leon, sitting alongside a brown skinned woman identified by the caption at the bottom of the picture simply as Thelma. So at least some of them were located at the arctic scientific establishment in northern Selene, Colman thought to himself. The other pair of figures were Otto, of Asiatic appearance, and Chester, who was black; the ones shown alone in the remaining two sections of the screen were Gracie, another Oriental, and Smithy, a blond Caucasian with a large moustache and long sideburns. From their ages they were all evidently Founder. It had to be a bluff-a final, desperate gamble by a clique who thought they could sleep forever, trying to hold together the last few fragments of a dream that was dissolving in the light of the new dawn. Walters was a lot smarter when it came to the things that did matter. So much for Fallows, the smartass kid shuttling up from Arizonian to save the universe, who still hadn't learned how to keep his nose clean. Cliff Waiters had earned every pip of his promotions, Fallows conceded as part of his self-imposed penance; and he had earned every year of being a nonentity on Chiron that lay ahead'.
