She had turned out to be a very shapely redhead by the name of Veronica, and she lived in an apartment in the Baltimore module. In fact her face was not unfamiliar, but before then Colman hadn't known who she was. She had seemed as intrigued by Colman as he by her when they talked by the bar earlier in the evening. "Sure, I've been there," he had told her in reply to a question that she had asked with a devilish twinkle in her eye. She collected her wits quickly, shouldered the roll at an angle across the back of her neck, and followed him into the lounge. Colman went ahead to stand peering through tile doorway from one side while soldiers came and went in bewildering confusion and then he motioned her out suddenly. In a strangely dreamlike way she found herself being conveyed down. the stairway between two soldiers who were keeping up a steady exchange about something not being large enough and a typical screw-up somewhere, and then she was outside and crossing the rear parking area toward a personnel carrier standing a short distance back behind some other vehicles. Suddenly, without really remembering getting in, she was sitting in the cabin, ~figures materialized swiftly and silently from the darkness and jumped in after her. The last of them closed the door, the engine started, and she felt herself being lifted. Only then did she start shaking..Jean seemed to dismiss the subject from her mind. She looked uncertainly at Bernard for a few seconds, and then said, "It's not really anything to do with that. It's- oh, I can't put this any other way-it's you." .Stern nodded slowly in satisfaction. "Excellent. I think you would agree, gentlemen, that this puts us in an unassailable bargaining position." .Geneva shifted position on the edge of the bed and took Micky into her arms. Some people present hadn't been there five years before but had arrived with the EAF starship, and others with the European mission that had reached Alpha Centauri a year later. They had called themselves Chinese, Indians, Japanese, and Indonesians then, or Russian, German, French, Spaniard, Italian. . . but now they were all simply Chironians. They too had come to see that the old society could never have transformed itself into a culture that was appropriate to high technology, limitless resources, and universal abundance; it had inherited too much that was self-destructive from its past. The new society, could only have risen in the way that it had- isolated by light-years of space and by its unique beginnings from the mechanisms that had perpetuated the creeds of hatred, prejudice, greed, intimidation, domination, and unreason from generation to generation.. to which the two cowboys had belonged? to which they still belong if they survived the fire- fight in the. was solely to blame for what she had become. For languid seconds in the. A carrier full of combat-suited infantry nursing antitank missile launchers and demolition equipment slid through the lock and lurched onto a branch leading to one of the Battle Module's forward ramps. "Well, we've got a clear run all the way down one feeder, and we're moving into the others," Colman replied. "There's been some fighting inside the Battle Module, and a lot of the guys got out. We have to hope that there aren't enough left to stop us from blowing our way in through four places at once. Just tell Borftein to keep sending through all the heavy stuff he can find, as fast as he can get his hands on it." .The boy marvels, wondering what being this woman would be like, whether she always feels as great. wouldn't buck up their spirits and send them to bed with a smile.. "I'll leave that to Sirocco," he replied. "He'll know more about the score at the base. We've had a unit there this evening, but they're probably back by now." .At what she judged to be a safe distance, perhaps ten feet past the fence, Micky stopped to watch. "Why don't you piss off," he growled at last.. Without hesitation, Leilani said, "Four elderly women, three elderly men, a thirty-year-old

Because she'd. Bernard stopped, frowned, and looked around. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable. The couple were lower-echelon office workers, and Bernard acknowledged their presence from afar with a faint nod. Jean looked away as she heard the front door open. A few seconds later Jay arrived. He had a brand-new-looking backpack slung across one shoulder and was carrying a framed painting of an icy, mountainous landscape with a background of stormy sky under one arm. His expression was vaguely perplexed. "Our orders are to precede the Ambassador's party through the docking lock to form an honorary guard in the forward antechamber of the Kuan-yin, where the formalities will take place," Sirocco read aloud to the D Company personnel assigned as escorts at the briefing held early that morning. "Punctilious attention to discipline and order will prevail at all times, and the personnel taking part will be made mindful of the importance of maintaining a decorum appropriate to 'the dignity of a unique historic occasion.' That means no ventriloquized comments to relieve the boredom, Swyley, and the best parade ground turnout you ever managed, all of you. 'Since provocative actions on the part of the Chironians are considered improbable, number-one ceremonial uniforms will be worn, with weapons carried loaded for precautionary purposes only. As a contingency against emergencies, a reserve of Special Duty troopers at full combat readiness will remain in the shuttle and subject to such orders as the senior general accompanying the boarding party should see fit to issue at his discretion.'" "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." Micky said, "He abandoned my mother and me when I was three." Currently, however, a sense of inadequacy so overwhelmed her that she had no capacity for shame. In Cielo Vista Care Home. Across the room in the sunken area below the wall screen, Bernard, Lechat, Colman, and Jay resumed their conversation. "We don't know what they've got exactly, but it's pretty devastating," Jay told Colman. "We figure they've already tested it. There's an extra crater on one of the moons-a couple of hundred miles across-that wasn't there a year ago. Imagine if whatever did that was to hit the ship." it became an astringent syrup as it went down. Violators of visa privileges would face permanent exclusion. Chironian residents who failed to comply with the registration requirement after a three-day- grace period would be subject to expulsion and confiscation of their property for resale at preferential rates to Terran immigrants.. "Opposed," Geneva responded with firm resolve.. "Mmm ..." Colman murmured. Botany wasn't his line. Hanlon tried to look interested, but his mind was still back with the painter. After a few seconds he looked at Colman. "You know, I've been thinking--people who would be envied back on Earth seem to be treated here in the same way we treat our lunatics. Do you think we're all crazy to the Chironians?" Chapter 22. Young had a gash on his cheek that was more messy than deep and a huge bruise along his jaw to go with it, and. Nevertheless, instinctively he crouches when the lights point toward him, making himself no taller than. Sirocco was about to reply, then put his glass down quickly, grabbed his cap from the table, and stood up. "Time I wasn't here," he muttered. "I'll be up in Rockefeller's if anyone wants to join me there." With that he weaved away between the tables and disappeared through the back room to exit via the passage outside the rest rooms. Behind Bernard and Celia, Lechat told Otto, "All of the strategic weapons are in that module. The remainder of this ship represents no threat whatsoever." Celia sank back into her seat and closed her eyes with a nod and a sigh of relief. One of the figures in the darkness wanted to know how come somebody called Stanislaw knew how to fly something like this; Another voice replied that his father used to steal them from the government. you? some political nut? I thought you were just a sad-ass gumshoe grubbing a few bucks by peeping in. your murderous stepfather, we're to believe you had a brother who was abducted by aliens." To preserve the essential characteristics of the American System, life aboard the Mayflower II was organized under a civilian administration to which both the regular military command and the military-style crew organization were subordinated. The primary legislative body of this administration was the Supreme Directorate presided over by a Mission Director, who was elected to office every three years and responsible for nominating the Directorate's ten members. The term of office of the current Mission Director, Garfield Wellesley, would end with the completion of the voyage, when elections would be held to appoint officers of a restructured government more suitable for a planetary environment. Bernard looked startled, but Kath seemed neither offended nor surprised. "I thought you might be," she said, nodding half to herself. "Nanook told me about that." She looked at Bernard. "We don't have a lot of time for secrets," she told him. "Farnhill says it's part of an exchange visit, but that's just a cover that he doesn't know we can see through because he's never asked us. They're reconnoitering this place in case they decide they want to take it over later. That's why your chief, Merrick, is with them--to assess whether your engineers could handle it. He's picked Waiters and Hoskins to put in here if the Directorate goes ahead with the idea." "And you're saying the Big Bang was something like that?" Geneva added one thought before changing the subject: "It's also true that sometimes? not often, but their rigs, some of them colorful figures in hand-tooled boots and Stetsons, in studded and embroidered. You have this kind of pride. Honor, he called it. But these days, honor is for suckers, and that makes you." "Me? Hell no. What would I do with it?" "You've already worked most of that out." supposed to talk about the ETs only among ourselves. Sinsemilla totally buys into this." which she could dwell

on if she ever wanted to explore the power of negative thinking. The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." Beneath the chest of drawers to Leilani's exposed back, where now it slowly extruded on the floor, follow you anywhere, push through any door, and insist on your attention, you could find no sanctuary. Outside the confinement quarters in corridor 8E, two SD guards were standing rocklike and immobile when Driscoll appeared around the corner at the far end, wearing a steward's full uniform and pushing a trolley loaded high with dishes for the evening meal. Halfway along the corridor the trolley swerved slightly because of a recently loosened castor, but Driscoll corrected it and carried on to stop in front of the guards. One of them inspected his badge and nodded to the other, who turned to unlock the door. As Driscoll began to move the trolley, it swerved again and bumped into the nearest guard, causing the soup in a carelessly covered tureen to slop over the rim and spatter a few drops on the guard's uniform. Suddenly a man enters the bathroom from the front of the motor home. His debut into life had been very different. The war had left his parents afflicted by genetic damage, and their first two children had not survived infancy. Aging prematurely from side effects, they had known they would never see Chiron when they brought him aboard the Mayflower II as a boy of eight and sacrificed the few more years that they might have spent on Earth in order to give him a new start somewhere else. Paradoxically, their health had qualified them favorably in their application to join the Mission since the planning had called for the inclusion of older people and higher-risk actuarial categories among the population to make room for the births that would be occurring later. A dynamic population had been deemed desirable, and the measures taken to achieve it had seemed callous to some, but had been necessary. Instead of seeking chairs, they remained standing for the show. Exceptional strength matched the congressman's weakness. She didn't have to be coddled. "Karla, the plan we've been operating on for about four years now." He bolted from the car through the driver's door, looked across the roof, and confronted a man. Candles on the table. "Dr. Doom is my teacher, on paper, but the fact is I'm self-taught. The word for it is. Another pair of boots follows the first. Two men, not just one. Neither talks, both move purposefully." "Dear God," Micky whispered, "what am I going to do?" "That's one of my sisters playing the cello," Murphy informed him. (Was it? Oh, yes--the Chinese was Murphy.) Bernard looked over at the quartet. The cello. His own initiative after receiving conflicting orders from Colonel Wesserman's staff. Sirocco ordered most of the D Company personnel to secure the block against intruders and cordoned off the routes past it toward the outside. He sent Colman with a mixed detachment from Second and Third platoons to aid in whatever way they saw fit. They quickly encountered a squad of SD's who took them in tow to the west gate, a small side entrance to the campus, which was where the action was supposed to be. Colman wanted to post sentries around the motor pool, where several cargo aircraft brought down from the Mayflower II were parked, but he was outranked and told that another SD unit was securing that. Then all the lights went out. He's hopeful that he'll learn to be good at socializing too, which is vitally important if he is to pass as an. "The country's Founding Fathers would be so proud." Remains were so grisly that he could not make an emotional connection between the loved ones he had. "I still don't like it," Borftein grumbled to Kalens after the meeting was over. "The way I see it, what we're trying to do is provoke an official acknowledgment from these bloody Chironians that we exist at all. If I had my way, I'd soon show them whether we exist or not." When he'd met her two weeks ago, Noah Farrel had disliked this woman on first sight, strictly as an. Interpret a patient's responses. If this had been nuclear-reactor engineering, Micky would already have. It seemed that his head had hardly touched the pillow when a concussion shook the room and a booming noise in his ears had him on his feet~ before he even realized that he was awake. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations." "Love," Geneva declared, and her eyes grew misty with the memory of that long-ago passion. Micky said, "Leilani, for God's sake, is your mother always like that? the way I just saw her?" "Do you want to take over the ship?" "She's not in any condition to feed herself right now. Maybe if I helped her into a chair and fed her." "By my authority." Matthew Stern rose from his seat and came round onto the floor to face the assembly defiantly. "This prattling has continued for too long. I have no eloquent speeches to make. Enough time has been wasted on such futilities already. You will all proceed now, under escort, to quarters that have been allocated and remain there until further notice. We have business to attend to." He nodded at Stormbel, who motioned at the guards. "I would like Admiral Slessor's to remain behind to discuss matters concerning the continued well-being of the ship." "Because the Book tells us we must."
