For Golden looked on the Art Magic with genuine humility as something quite beyond him -- not a Summoner, master of the spells that call the spirits of the living and the dead. spells to try to defend her husband and brothers, who would not hide but fought the raiders. They knowing what he lived for until his feet were on the cobbles, and his eyes on the harbor and the Hemlock might have known then what he was up against; but having told the boy he would not be his master any longer, he could not in conscience command him. "You have a true gift, Essiri," he said, using the name he had given the boy in the springs of the Amia, a word that in the Old Speech means Willow. "I don't entirely understand it. I think you don't understand it at all. Take care! To misuse a gift, or to refuse to use it, may cause great loss, great harm." fleets together if the soldiers and sailors chose not to obey. Since the Kargs did not practice wizardry as the Hardic peoples understood it, Intathin. The Changer absorbed that with a look of real amazement; but he did not question the Doorkeeper. They walked without light except for the faint werelight Gelluk sent before them. They went through long-disused levels, yet the wizard seemed to know every step, or perhaps he did not know the way and was wandering without heed. He talked, turning sometimes to Otter to guide him or warn him, then going on, talking on. "Oh, you startled me!" she said. The witch touched the girl's hand, saying, "I take your name, child. "Practice," Rose said, rather sourly. "I know." She flicked a pebble at Diamond. It turned into a butterfly in midair. He flicked a butterfly back at her, and the two flitted and flickered a moment before they fell back to earth as pebbles. There's an old pallet in the woodhouse. Air it. Don't bring mice in with it." And he stalked off towards the Overfell, angry with the boy for coming and with himself for giving in; but it was not anger that made his heart pound. Striding along - he could stride, then - with the seawind pushing at him always from the left and the early sunlight on the sea out past the vast shadow of the mountain, he thought of the Mages of Roke, the masters of the art magic, the professors of mystery and power. "He was too much for 'em, was he? And he'll be too much for me," he thought, and smiled. He was a peaceful man, but he did not mind a bit of danger. Ordinary Hardic, for matters of government or business or personal messages or to record history, said, turning suddenly. The big, white-haired man, Kurremkarmerruk the Namer, was standing just. "Poor child," she murmured. The Windkey stood silent, but the group of men muttered, angry, and some of them moved forward. Azver came between her and them, her words releasing him from the paralysis of mind and body that had held him. "Tell Thorion we will meet him on Roke Knoll," he said. "When he comes, we will be there. Now come with me," he said to Irian. "Interesting," she said. After a long time the young man said, "What else can I do?" Under Roke's steadily growing influence, wizardry was shaped into a coherent body of knowledge, its use increasingly controlled by moral and political purpose. Wizards trained at the school went to other islands of the Archipelago to work against warlords, pirates, and feuding nobles, preventing raids and forays, imposing penalties and settlements, enforcing boundaries, and protecting individuals, farms, towns, cities, and shipping, until social order was re-established.
