Not only did the carpeting continue up the walls, but as she walked from the kitchen, across the lounge area to the fireplace, and turned to look up at the sleeping loft, each place her feet touched a patch changed color to a pale, clear yellow. She stared, then laughed and ran her hands along the back of a chair. It, too, changed color, to a pattern of pastel greens and yellows..gentlemen like to receive their paychecks. There is considerable indirect evidence one can bring against this view. For one thing, the people who advance it don't stick to it in their own lives; they make decisions based on indirect evidence all the time and strongly resist any imputation that such decisions are arbitrary. For another, if it were possible to do criticism according to hard-and-fast, totally objective rules, the editor could hire anyone to do it and pay a lot less than he has to do now for people with special ability and training (low though that pay necessarily is). It's true that the apparatus by which critics judge books is subjective in the sense of being inside the critic and not outside, unique, and based on the intangibles of training, talent, and experience. But that doesn't per se make it arbitrary. What can make it seem arbitrary is that the whole preliminary process of judgment, if you trace it through all its stages, is coextensive with the critic's entire education. So critics tend to suppress it in reviews (with time and training most of it becomes automatic, anyway). Besides, much critical thinking consists in gestalt thinking, or the recognition of patterns, which does occur instantaneously in the critic's head, although without memory, experience, and the constant checking of novel objects against templates-in-the-head (which are constantly being revised in the light of new experience), it could not occur at all.* Hence angry readers can make the objection above, or add:"That's what you meant, all right. And don't make it anything flip like that last one. Make it sad and delicate and use some rhymes." Smith got his consignment of Ozos early in the week, took one home and left it to his store manager to put a price on the rest. He did not bother to use the production model but began at once to build another prototype. It had controls calibrated to one-hundredth of a second and one millimeter, and a timer that would allow him to stop a scene, or advance or regress it at any desired rate. He ordered some clockwork from an astronomical supply house. On the side of the trunk that now sat in the corner was a small triangular door that Amos had not seen. The grey man pulled it open, tossed in the ruby, and slammed it quickly: Orghmftbfe. This fertilized egg cell cannot become an independently living organism for some nine months, for it must divide and redivide within its mother's womb and be nourished by way of its mother's bloodstream. It must develop, specialize, and grow larger until it has developed the necessary ability to live independently. Even after it emerges from its mother's womb, it requires constant and unremitting care for a period of time before it can be trusted to care for itself. I smiled. "Hello, I'm Bert Mallory. I just moved in to number five. Miss Nesbitt tells me you like to." "Were you serious about the batteries?" Lang asked. "You know ... I wish ... (This in its final, expanded form was to become the longest poem in her next collection, "The Ballad of Lucius McGonaghal Sloe," which begins: The Podkayne was barely visible behind a network of multicolored vines. The vines were tough enough to frustrate their efforts to push through and enter the old ship. But both lock doors were open, and sand had drifted in rippled waves through the opening. The stern of the ship was nearly buried. "Okay, keep spread out on both sides, everybody. Jim, can you and Edie head him off before he gets to the woods?" I told him about the package and he agreed it was a nice one. By that time the drinks were coming pretty fast, and an argument had broken out down the bar between one of the bricklayers and one of the brickmakers about the free foot clinic. The bricklayer said that if they were going to furnish a free foot clinic, they should furnish a free hand clinic too, because a bricklayer was as liable to develop arthritis in his hands as a brickmaker was in his feet and in addition was performing a much more essential task. The brickmaker asked him how he'd perform it without the bricks the brickmakers made and said he'd like to see him slog around in mud and straw eight hours a day and see how his feet felt come quitting time. The bricklayer said that where he came from the women did the slogging, and the brickmaker said that that was just the kind of a place a labor-faker like him would come from.
