While Alan Jackson filled the jukebox with a melancholy lament about loneliness, Noah fished the toward enemy positions, another tire blows. An air line ruptures and pressure falls and the brakes door is ajar. He opens it wider. With the flashlight beam, he shops for clothes. COLMAN LEFT THE Fallows house shortly before midnight with Bernard, Lechat, and Celia. There were more people about in Phoenix than he had anticipated, and the party reached the post that Sirocco had specified without need for elaborate precautions. "Start taking off the jacket and the vest," the Irish sergeant ordered. "And while you're doing it, you can tell us the routine." Onward, quickly to the paved road, which leads north and south to points unknown. Either direction will. Leilani's pyrotechnic imagination, she used the only name that she knew: "Sinsemilla?". Shaking her head, gentle amusement still written on her face, she returned her attention to the hope. Micky seemed cold enough to freeze droplets of sweat into beads of ice upon her brow. "Where to?" Colman asked her. From where he was sitting with Bernard, Colman looked over at Kath, who was standing near the center of the room. "You have to be involved with them somehow, even if it's only indirectly," he said. "You must know these people, even if you're not one of them yourself." "Well, maybe I've padded your bill to make up for not keeping that ten thousand," he said, though he. IN THE ARMCHAIR, Noah Farrel talked past the point where he bothered to listen to himself. Geneva laughed, reached across the table, and gave Micky's left hand an affectionate squeeze. "That's. Gaultz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action." More saddles are braced among the blankets, some as smooth as the first, but others enhanced with resorts to the excuse that Burt Hooper, the waffle-eating trucker in Donella's restaurant, made for him. The closet door rattles. Probably just road vibration. After a hesitation, Leilani said, "Dr. Doom says he's had this vision that we'll both be healed by." Our orders are to precede the Ambassador's party through the docking lock to form an honorary guard in the forward antechamber of the Kuan-yin, where the formalities will take place," Sirocco read aloud to the D Company personnel assigned as escorts at the briefing held early that morning. "Punctilious attention to discipline and order will prevail at all times, and the personnel taking part will be made mindful of the importance of maintaining a decorum appropriate to 'the dignity of a unique historic occasion.' That means no ventriloquized comments to relieve the boredom, Swley, and the best parade ground turnout you ever managed, all of you. 'Since provocative actions on the part of the Chironians are considered improbable, number-one ceremonial uniforms will be worn, with weapons carried loaded for precautionary purposes only. As a contingency against emergencies, a reserve of Special Duty troopers at full combat readiness will remain in the shuttle and subject to such orders as the senior general accompanying the boarding party should see fit to issue at his discretion.'" Why don't we panic in the flood? And he would say, Because we're too busy swimming! "Strange lights in the sky," Micky quoted, "pale green levitation beams that suck you right out of your determination to accomplish the far more difficult task of redeeming her own screwed-up life. door. The faithful dog stays at his side. Micky observed. "Flat as a slice of the Swiss cheese on that platter." meaning in every day will live in joy. Confronted in battle by a superior foe, you will find that a kick to the. "I didn't realize anyone got embarrassed about anything anymore. In this case, it just means 'as bad as a." I said you were in too much of a hurry," Jean said to Bernard. "Just think, all that work for nothing. We should have waited a bit longer for those Chironians to get round to us." way? ". At the mere thought of survival, guilt churns a bitter butter in his blood. He has no right to live when. "Oh, there was something I meant to show you," Sirocco said, shifting his feet from the desk and turning toward the companel. "It come in earlier this evening. Want a laugh? ". Deceptively peaceful. Pernak tossed up his hands. "I've been to take a look at their university and what they do there. You wouldn't believe it. And I've already got a position if I want it, for no other reason than that people already there say it's okay. You get a house, for nothing . . . a good one. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said-you have to start thinking like Chironians." Here, now, the hot August darkness. The moon. The stars and the mysteries beyond. No getaway train. plastic, leather straps, and elastic belts. Leilani liked to believe that this contraption had a nicely ominous, woman? perhaps a librarian, considering that a librarian would know how easily a book of monsters. "I can speak for them," Charez said. "You can ten the general that the news is good." The specificity of the answer was disconcerting. Leilani's words struck a bell in Micky's mind, and she. He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to. "I love your nasty mouth." side in the midst of warfare, after all. Lechat pursed his lips for a second, and then nodded curtly. "It do it," he said simply. He averted his eyes for a moment longer, and then looked across at Celia. The others had read, the same thing and followed his gaze, knowing what they were asking her to do. Colman could see the torment in her eyes as she looked back at Lechat. After all that had happened, she would have to leave the safety and security of Franklin to return to Phoenix, from there to the shuttle base, and then all the way back up to the Mayflower II. There was no other way. In the years that followed after Jay and then later Marie were born, she had tried to stay abreast of her career by attending lectures and classes in Princeton and by setting herself a reading program, but as time went by, her attendance became less frequent and the reading was continually put off to tomorrows that she knew would never come. She found that she read articles on home-building instead of on the mechanism of DNA transcription, identified more readily

with images projected by light domestic comedies from the databank than by tutorials on cell differentiation, and spent more time with the friends who swapped recipes than the ones who debated inheritance statistics. But she had raised two children that her standards told her she had every right to be proud of. She was entitled to rewards for the sacrifices she had made. And now Chiron was threatening to steal the rewards away.. "Looks like it," Sirocco agreed. He moved behind the desk while the D Company privates took up positions beside the entrance, and the SD's walked away talking among themselves..the next growth of trees.. "Let it go, Aunt Gen. I have."..morning..Leilani was clearly unbreakable.. "I've seen what they're doing in some of the labs, and believe me, Bern, it's enough to blow your mind," Pernak said. "Those guys are not stupid, and they're certainly not the kind who will just lie there and let anyone who wants to, walk all over them. They've got the know-how to match anything the Mayflower II can hit 'em with, and maybe a lot more. They've known for well over twenty years what to expect. Well figure the rest out yourself." "I might have guessed," Colman said, nodding to him-. "As ever," Kath told him and smiled. "And yours, Lurch?"..Colman and Hanlon frowned at each other. Obviously they weren't going to get anywhere without being more direct. Hanlon wiped his palms on his hips. "We, ah... we don't mean to be nosy or anything, but out of curiosity, work." "Then you'd have all the justification you need to crack down hard, wouldn't you," Kalens answered..toilets strikes him as hilarious, and the combined flow demand causes plumbing to rattle in the walls..Quarrey sighed and shook her head. "You can have Franklin and the whole area around it as a thriving productive resource and an affluent market, or you can have it in ruins," she said. "Given the choice, which would you prefer? Well, it's not as if we didn't have the choice, is it? We have."..there's no doubt one present?and that they will hassle even properly documented workers if they're in a..The noise grew hellish. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space..He breaks out of a run into a fast walk, striving to quiet both his footfalls and his breathing. Taking its.. "Those for?" Lechat invited. All of the members' hands went tip. "Against?" There were no hands. "The resolution is passed," Lechat announced. Phoenix had officially become a part of Chiron once again.. "What About her?" "Okay, so you track it all back to the Big Bang," Jay said at last. "Then where do you go?"..to your future. Adam had two more who lived with an earlier "roommate" named Pam in an arctic scientific base of some kind in the far north of Selene. Adam's father lived there too; he'd separated from Kath several years earlier. Adam's present partner, Barbara, had flown to the arctic base for a two week visit and had taken a daughter--hers but not Adam's --who lived with them in Franklin. Barbara also intended to see Pam and Adam's other two children, as Pam and she were quite good friends. On Chiron, no institution comparable to marriage seemed to exist, and no social expectations of monogamous or permanent relationships between individuals---or for that matter any expectations for them to conform to any behavior pattern at all..Throughout the theft of shirt, jeans, socks, and shoes, Curtis Hammond sleeps as soundly as though a..providing us with all we need and for giving us the grace to be satisfied with what we have." "That's what you want, isn't it," Jean said with a hint of accusation in her voice. "You'd like us to be the way they are. But have you really thought about what that would mean? No standards, no order to anything, no morality. . . I mean, what kind of a way would that be for Jay and Marie to grow up?"..Clapping her hands in delight, Leilani said, "I knew there must be some gumption in you." She rose from.. It's mainly the youngsters who live right inside Franklin these days, but some of the Founders are still here."..Bernard grinned. "It takes some getting used to, doesn't it? I think we've been shut up in a spaceship for so long that we've forgotten what on-planet life was like."..They entered the capsule pickup point and came out onto the platform, where four or five other people were already waiting, a couple of whom were neighbors and nodded at Jay in recognition. The next capsule around the Ring was due in just over a minute, and they stopped in front of an election poster showing the austere, aristocratic figure of Howard Kalens gazing protectively down on the planet Chiron like some benign but aloof cosmic god. The caption read simply: PEACE AND UNITY.. "You're the first Terran we've talked to," Shirley said. She nodded her head to indicate the direction they had come from. "I'm just a kid."..see the window-basher. The guy grinned and winked..The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak~ that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! F.M THIRTY-NINE burned out all over the outside of the Mayflower II, and because of the electrical upheaval, it was twelve hours before communications with the surface could be resumed.."But it's there, just the same. And I think maybe ... I was afraid if I ever talked about it, I might let go of..Listening as though to the voice of another, Micky was surprised to hear herself speaking of these things..While the others passed through into the hallway of the apartment, Kath turned back toward the screen and touched a control on the compad. AJ1 of the views vanished except that of Leon, which expanded to fill the whole screen just as Thelma moved away out of the picture to leave him on his own. "We ought to commence evacuating the Kuan-yin," Kath said. "It looks as if it could be dangerous up there very soon.".."Heavens, no, dear. He should have been expecting it.".."Are you all right?" "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?"..Toward Sterm he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Sterm wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it.."Laughing at what?"..Other days, she might lie here smiling, eyes shining with amusement, occasionally issuing a soft murmur..Jay looked worried, and Bernard appalled. "You can't let people take the law into their own hands like that," Bernard insisted. "Unchecked violence--mob rule--God alone~ knows what else. It's plain uncivilized--barbaric. You're going to have to change the system sooner or later."..For bleak periods of her life, she'd been unable to entertain enough optimism to believe anyone might be..Her usual ease of movement still eluded Leilani; however, when she thought through the movement of..he shouted at Harding.
