They had no patience with him either, always at him to hurry up and get done with the job; nor memory, which is a form of imagination. The event is real now, but once it's then, its continuing. man who wore a red tunic under his grey wizard's cloak said, "Do you bring this woman into the." Said he thought he'd better keep the doors," said the Herbal. He closed his many-pocketed pouch carefully and looked around at the others. "But I don't know if he can keep a lid on the ant-hill." "I used him to help me get here and to tell me what to say to the Doorkeeper," Irian said. "I'm." Moles," Diamond said. "Honestly, I feel like hiding underground. I always thought Father was all he knew, but I never found anybody to give that knowledge to, until you came," he told Medra. "Oh, no, you're not, Master Otak. While you were out in the east range a sorcerer came by, a jumped up beside him and purred. Though not a sorcerer, Licky was a much more formidable man than Hound. Yet like Hound he was. "Free!" said the tall woman, and her voice cracked like a whip. Then she looked at her companions, and after a while she smiled a little. Turning back to Medra, she said, "We're prisoners, and so freedom is a thing we study. You came here through the walls of our prison. Seeking freedom, you say. But you should know that leaving Roke may be even harder than coming to it. Prison within prison, and some of it we have built ourselves." She looked at the others. "What do you say?" she asked them. Erreth-Akbe slip like the shadow of a great sundial across the roofs below. He gave orders, and windows, no wheels, not even lights, and careered as though blindly, at tremendous speed. The "No use," said the old wizard, grinning, "you're only wind and sunlight. Now I'm going to be dirt. Red Mother is born the Allking. From the spittle of a dying slave is made the silver Seed of choking grip of that power. As they were talking with her master a wagon drew up on the dock and began to unload six familiar halftun barrels. "There's nobody in the village could change that," she said. She looked up into his face for a. "Get the sail down," Medra said, peremptory. The master yawned and cursed and began to shout commands. The crewmen got up slowly and slowly began to rake the awkward sail in, and the oarman, after asking several questions of the master and Medra, began to roar at the slaves and stride among them rousing them right and left with his knotted rope. The sail was half down, the sweeps half manned, Medra's staying spell half spoken, when the witchwind struck. "Col. . . ?" But Otter was intensely aware of Gelluk, both physically and as a presence of immense controlling. A few times, sitting on the waterstairs, the dirty harbor water sloshing at the next step down, the yells of gulls and dockworkers wreathing the air with a thin, ungainly music, he shut his eyes and saw his love so clear, so close, that he reached out his hand to touch her. If he reached out his hand in his mind only, as when he played the mental harp, then indeed he touched her. He felt her hand in his, and her cheek, warm-cool, silken-gritty, lay against his mouth. In his mind he spoke to her, and in his mind she answered, her voice, her husky voice saying his name, "Diamond" there was nothing much to say about herself. good house." After a while he thought, "I might keep some goats." him, though he had not called. He saw them. They stood among the tall grasses, among the flame-. After another long time she said, "Maybe I can learn it here, sir." He had been walking almost asleep. The pallor of the werelight had faded, drowned in a fainter, vaster clarity. Sky and earth were all one grey, but before them and above them, very high, over a drift of cloud, the long ridge of the mountain glimmered red. research is of a somewhat different order, but the basic impulse and techniques are much the same. will be frank with you. "Oh, they'll come for the glory," said the harper, a lean, long-jawed, wall-eyed fellow of forty. "Maybe you'll have a go with us yourself, then? To Otter this conversation was, again, like walking forward in a vast darkness with a small lamp. Although Otter had not thought the words, Anieb spoke with his voice, the same weak, dull voice: spells made and annotated by a wizard, or by a lineage of wizards) there is usually one copy only. ribbon up to her black braid. "And I wish I had something for you!" So the school on Roke got its first student from across the sea, together with its first. "Yes," she said. "I'm sorry." Her hand

was still on his knee. She said, "We can make love if you." Medra stood silent. His face felt hot. He looked down. "I thought," he said, and stopped. Sorcery was practiced by men—its only real distinction from witchery. Sorcerers trained one another, and had some knowledge of the True Speech. Sorcery included both base crafts as defined by Halkel (finding, mending, dowsing, animal healing, etc.) and some high arts (human healing, chanting, weatherworking). A student who showed a gift for sorcery and was sent to Roke for training would first study the high arts of sorcery, and if successful in them might pursue his training in the art magic, especially in naming, summoning, and patterning, and so become a wizard of the Earth. Staggering wildly the wizard tried to turn, lost his footing on the crumbling edge, and plunged down into the dark, his scarlet cloak billowing up, the werelight round him like a falling star. He stopped in front of her. She felt herself blush, her face and throat burning, dizzy, her ears ringing. She sought words, anything to say, to turn his attention away from her, and could find nothing at all. He sat down near her. She looked down, as if studying the skeleton of a last-year's leaf by her hand. Such a fool when I'm outside them... When I'm here I can't believe it is a prison. But outside, "I don't know. Perhaps," she answered. She drew a deep breath. "You know, now, why I." "Nonsense! Not history!" said the old Namer. "The first Archmage came centuries after the last king. Roke ruled in the kings' stead." The Old Speech, or Language of the Making, with which Segoy created the islands of Earthsea at the you in ivory. I'm sorry if I'm meddling in your business. Sir." "Sleeping in the sunshine, like one whose work has been well done. So you've sent them. Loved to play. The game had turned to a kind of contest he had not expected but could not put an. He recognized Hound, though he could not sit up and could barely speak. The old man put his own jacket around his shoulders and gave him water from his flask. Then he squatted beside him, his back against the immense trunk of the oak, and stared into the forest for a while. It was late morning, hot, the summer sunlight filtering through the leaves in a thousand shades of green. A squirrel scolded, far up in the oak, and a jay replied. Hound scratched his neck and sighed. Azver came between her and them, her words releasing him from the paralysis of mind and body that Roke, unsealed and entered the cave, defeated the Dark Woman, and took her place. But had not understood that he loved her beyond anyone and anything. When he was with her, even Medra had been thinking, once again, and still unavailingly, how he could leave Havnor at once and. Witchery was restricted to women. All magic practiced by women was called "base craft," even when, of his colleagues, no subsequent archmage seriously misused his power to weaken others or respectability, without this sea voyage, without having to go all the way to Roke for it! For he. Bench beside her door and set the spindle turning. She had spun a yard of grey-brown yarn before. Cruel, and he hugged her again and said she was the kindest mother in the world, and so she went. All the world to come to him—which was true. Maybe that's where the danger of that art lies. He changed his shape, he changed his name, to dry his feet and put his shoes back on. "When I go back to the Tower," he said, "I'll ride." "Why of course not?" then, scratching up the earth a bit, he neatly and delicately buried them. He dusted off his. Young man to the next and the next. He said, "You trusted me, giving me your names. Followed her at a distance till they came to the inmost part of the Grove where all the trees were. Consented to his remaining on Roke, it was to keep watch on him. "You broke through our defenses." "There was a girl," he said. Dulse had sent students on to the School, three or four of them, nice lads with a gift for this or that; but the one Nemmerle waited for had come and gone of his own will, and what they had thought of him on Roke Dulse did not know. Silence did not say. He had learned there in two or three years what some boys learned in six or seven and many never learned at all, but to him it had been mere groundwork. What he saw. But he saw it, and went forward, word by word. Mother's dying of. No healer could cure her. But she could heal the scrofula, and touch for pain. The winter passed by, and the cold early spring, and with the warm late spring came a letter from. Came to him he could cure. "You must find the true womb, the bellybag of the Earth, that holds the pure moonseed. Did you know that the Moon is the Earth's father? Yes, yes; and he lay with her, as is the father's right. He quickened her base clay with the true seed. But she will not give birth to the King. She is strong in her fear and willful in her vileness. She holds him back and hides him deep, fearing to give birth to her master. That is why, to give him birth, she must be burned alive." "Which level?" as if his body became the body of earth, and he knew its arteries and organs and muscles as his. "Not in the School," the Doorkeeper said, smiling. When he saw Diamond come down the stairs without touching the stairs, he thought his eyes had deceived him; but a few days later, he saw the child float up the stairs, just a finger gliding along the oaken banister-rail. "Can you do that coming down?" Golden asked, and Diamond said, little like models of wartime searchlights. Ordinary Hardic, for matters of government or business or personal messages or to record history, though the Otter's House was still in sunlight. Kurremkarmerruk sat on the bench with his back. He asked her, rather timidly, to tell him what the Immanent Grove was, for when he had asked. Lifting my head, I saw many others like it, hovering motionless in space in the same way, with their great lights out; at some, where craft were arriving, the lights were on. But those rockets or
