"The last time we went to see the complex at Port Norday." Bernard stared blankly at him. Merrick seemed pained. "Don't tell me you didn't know. I went there with Walters and Hoskins a while ago. Didn't Walters tell you about it?".She was in her late thirties--Te. Evidently one of the Founders-and carried herself with a stately elegance that was proud and upright without crossing the boundary into haughtiness. Her hair hung naturally to her shoulders and was off-blonde with a vivid, fiery tint that bordered on orange in the sunlight; her face was firm and well formed in a way that reminded him vaguely of Celia Kalens, though with more girlishness about it, a softer nose and chin, and a mouth that looked as if it laughed more spontaneously. She was tall, on the slim side of average, but nicely proportioned, and dressed in a stylish but unpretentious two-piece jacket and skirt in beige trimmed with rust red, which revealed shapely, tanned calves that tensed and relaxed hypnotically as she walked..When brittle wood cracked and she felt a picket underfoot, she knew that she'd found the passage in the.Without shame, the mutt squats and urinates on the blacktop..we're proud of them."."Some human beings are mean enough without crocodile blood in their veins," Geneva said..away with the spring of pride in her step..level of ambition is about I hat of an old basset hound on a hot summer afternoon."..temporary emotional paralysis. Sirocco inquired, propping his feet back on the desk. "Figured it out yet?". "Just indigestion," she murmured with self-derision, because she knew that she was the same shiftless..CHAPTER FIFTEEN.listen with your heart.."She gets eighty-six thousand a year," Noah said.."I bet he did," Marie declared..Just then, two Chironian girls strolled around the corner from the narrow corridor. They looked fresh and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Instead they paused and looked at him not unpleasantly, but with a hint of reserve as if they wanted to smile but weren't quite sure if they should..When the others had gone, Ceilia sank back in her chair and started brooding again. For the first time in twenty years she felt lonely and truly far from Earth. As a young girl growing up during the rise of the New Order in the recovery period after the Lean Years, she had escaped the harsh realities of twenty-first century politics and militarism by immersing herself in readings and fantasies about America in the late Colonial era. Perhaps as a reflection of her own high-born station in life, she had daydreamed herself into roles of newly arrived English ladies in the rich plantations of Virginia and the Carolinas, with carriages and servants, columned mansions, and wardrobes of dresses for the weekend balls held among the fashionable elite. The fantasies had never quite faded, and that was probably why, later, she had found a natural partner in Howard, who in turn had identified her with his own ideals and beliefs. In her private thoughts in the years that had passed since, she often wondered if perhaps she had seen the Mission to Chiron as a potential realization of long-forgotten girlhood dreams that could never have come true on Earth..CHAPTER THIRTY-SEVEN.Colman sat up and rubbed his eyes. "Why didn't he put a call through?".Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..blacktop..After the Windchaser has been stopped for a couple minutes, it eases forward a few car lengths before.If wishes were fishes, no hooks would be needed, no line and no rod, no reel and no patience. But.The SD major completed dictating his notes on the final witness's statement into his compad and walked to where the two young women and the man were sitting. Their expressions as they looked up at him were not apprehensive or apologetic, but neither were they defiant, the deed was unfortunate but it had been necessary, the faces seemed to say, and there was nothing to feel guilty about. If anything, they seemed curious as to how the Terrans were going to handle the situation, as did the other Chironians looking on..Ten years went by while North America and Europe completed their recovery, and the major Eastern powers settled their rivalries. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..He boosts himself against the sill. his hands to drop down to his chest. "And how are you settling in? Is your family adjusting well?" "Deleted," the machine confirmed. "Last line of entry reads: "... shut up behind a fence, ignored, and looking ridiculous." Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life out, huh?" he said gruffly. It saved a lot of pointless questions. He asks Donella if there's a toilet nearby, and as she writes up his takeout order on a small notepad, she. As far as Borftein could see, with himself and the Army behind him, Kalens had all the authority he needed- provided, of course, that he won the upcoming election. But after talking to Sterm about it, Kalens had accepted that an attempt to impose authority over Chiron overtly would risk alienating the Mission's population. A more subtle approach was called for. "Ultimately, human instincts cling to the known and the familiar," Kalens lectured Borftein later. "A visible commitment to lawfulness as a alternative to the lawlessness of this planet is the way to maintain cohesiveness. We can't afford to jeopardize that." So Borftein had -agreed to try playing the game their way, which hinged upon provisions written into the laws to take account of the abnormal circumstances of a twenty-year voyage through space. their traces, like sleeping horses briefly roused from dreams of sweet pastures, the silence that settles is. and at the center of the design is he himself, caught and murdered. face. But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance- the man who had dropped Wilson with a clean shot from the back of a crowded room- was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed- combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers. At once the mutt skids to a stop, and so does Curtis. They look at each other, at the door, at each other. Celia waited for a few minutes to give anybody a chance to come back for something, then stepped from the shower, found the clothes that Veronica had left, and spent a few minutes putting them on and lacing the boots. Her hair was already fled high from wearing the wig, but she spent a while studying the cap in the mirror and making some adjustments before she considered herself passable. "What About her?" "Engineering. That's the one you're with, isn't it?" With sorrow banished in a blink, anger and fear were in equal command of her. "You don't own me!" people are homicidal tooth fetishists. A short silence fell while the meeting digested the observation. Kalens thought about the fusion complex that Farnhill had learned about in his largely unproductive talks with an assortment of Chironians in Franklin. Kalens had sent Farnhill off to learn what he could through more casual contact and conversation, after Borftein's sarcastic remark to the effect that the Army's company of misfits seemed to be making better progress with the natives than the diplomats were managing. "Yes. . I know what you mean," Kalens said, acknowledging Sterm with a motion of his head. "As a

matter of fact, we have already begun inquiries along those lines." He turned toward Farnhill. "Amery, tell us again about that place along the coast." sharpened on the whetstone of sleep. "Hot. But spike it," Micky said. Bernard spread his hands resignedly. "Very well, I can see the sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship." Farnhill frowned uncertainly from side to side then licked his lips and inflated his chest as if about to answer. He deflated suddenly and shook his head. The words to handle the situation just wouldn't come. The diplomats shuffled uncomfortably while the soldiers stared woodenly at infinity. A few awkward seconds dragged by. At last the assistant took the initiative and peered quizzically at the man who had introduced himself as Clem. "And we like you, sweetheart," Geneva assured her. Rickster was dispatched to Cielo Vista. He arrived shy, scared, without protest. A week later, he. "There won't be a war on Chiron, will there?" Marie asked. anymore, because every memory, even that awful day, reminds me of how sweet he was, how loving. Laura was safe. Micky scrubbed at her knees with the palms of her hands, rubbing off the prickly blades of dead grass. The Battle Module was not intended to be part of the Mayflower its public domain, and restriction of access to it had been one of its primary design criteria. Personnel and supplies entered the module via four enormous tubular extensions, known as feeder ramps, that telescoped from the main body of the ship to terminate in cupolas mating with external ports in the Battle Module, two forward and two aft its midships section. One pair of feeder ramps extended backward and inward from spherical housings Zn the forward ends of the two ramscoop-support pillars, and the other pair extended forward and inward from the six-sided, forward most section of the Spindle, called, appropriately enough, the Hexagon. As if having to get through the feeder ramps wasn't problem enough, the transit tubes, freight handling conveyors, ammunition rails, and other lines running through to them from the Spindle all came together at a single, heavily protected lock to pass through an armored bulkhead inside the Hexagon. Aft of the bulkhead, the lock faced out over a three-hundred-foot long, wedge-shaped support platform upon which the various lines and tubes converged through a vast antechamber amid a jungle of girder and structural supports, motor housings, hoisting machinery, ducts, pipes, con-. Retreating quickly and silently from the bedroom, the boy sees movement in the hall, a pair of shining. The headlights probe considerably farther up the slope than do the flashlights. But they still reach far less. "We had to try," Wellesley insisted from beside Lechat. "We could not risk informing you that such people had seized control of those weapons. "I know one unit of the Army that could do it," he said. "And they operate best when nobody's trying to organize them." Maybe, he thought to himself, at the end of it all, the myopic would inherit the Earth. "I might just do that," Fallows said, nodding slowly. "Yeah .... I could use being out and about for a few hours. Thanks for the tip."
