Wellesley raised a hand a fraction. "Be careful you don't allow this to get too personal, Howard," he cautioned. "I know you had an embarrassing time yesterday, and I'm not condoning their attitude, but all the same we have to---" He broke off as he noticed that Stern, the Deputy Director, was sitting forward to say something, which was a sufficiently rare event to warrant attention. "Yes, Matt?" The others looked toward Stern curiously. "I've got two sisters you can't get in trouble with," Stanislaw offered. "Dumb." other side. Ripley usually had a big gun and a flamethrower. Here was where Mrs. D's occasional. "Dear God," Micky whispered, "what am I going to do?" Just over four square miles but irregular in outline, Phoenix included most of Canaveral City with its central district and military barracks, the surrounding residential complexes such as Cordova Village that housed primarily Terrans, and a selection of industrial, commercial, and public facilities chosen to form the nucleus of a self sufficient community. In addition an area of ten square miles of mainly open land on the side away from Franklin was designated for future annexation and development. Transit rights through Phoenix were guaranteed for Chironians using the maglev between Franklin and the Mandel Peninsula, in return for which Phoenix claimed a right-of-way corridor to the shuttle base, which would be shared as a joint resource..campground. "That was all a long time ago, Aunt Gen.".Wellesley turned pale, and the veins stood out on his temples. "I deny that! I also deny that you urged segregation. My policy was to encourage their leaders out into the open by a demonstration of peaceful coexistence, and you went along with it. Withdraw your statement.".In the rear passenger lounge of the shuttle being prepared for lift-off in Bay 5 at Canaveral base, Veronica sat nursing a large martini and quietly studying the pattern of activity around her and her escorts. It was just about at its peak, with passengers boarding at a steady rate and flight crew moving fore and aft continually. But most of the faces had not yet had time to register. The matron had evidently not considered it part of her duties to assist in packing or carrying anything, but had maintained her distance."You'd better mean it," Shirley warned. Driscoll nodded his mute assent also..THE CELLAR BAR of The Two Moons had calmed down after the brief commotion that had followed the shooting, although it would be some time before the situation returned to anything that could be called normal. Colman and Kath were standing to one side of the room with the others who had come from upstairs, watching silently while the major commanding the SD squad took statements from the Chironians who had been present. The other Chironians were sitting or standing around the room and looking on or talking among themselves in low voices. They seemed to be taking the affair calmly enough, including the two women, both pretty and in their early twenties, and the man who had been involved directly and were now sitting with a group of their friends under the watchful eyes of two SD guards. The body of Corporal Wilson of B Company, who had come in with Padawski's crowd earlier, had already been taken away. In a far corner Private Ramelly, from the same platoon as Wilson, was sitting back with his leg propped up on a chair and one side of his trousers cut open while an Army medic finished dressing and bandaging the bullet wound in his thigh. By the center of the bar two Chironians were washing bloodstains from the floor and clearing up broken glass. Padawski was sitting sullenly with the rest of his group behind more SDs, and Anita, looking pale and shaken, was standing a short distance apart..Gaulitz nodded hastily and touched a control to bring a view of the Kuan-yin onto the room's main display screen. It showed Chironian shuttles at all the docking ports, and more standing a few miles off and apparently waiting to move in. "this is a further corroboration from views obtained this morning," he said. "All indications are that the Chironians have evacuated the vessel, which supports the contention of its being cleared for action,".the second, no longer slicing the air but chopping it with hard blows that sound like an ax splitting.Mrs. Crayford glanced at the dock display on the room's companel.

After a second he looked up sharply again. "I'll do a deal with you though. Tell me after this is all over, okay?" "The best. I can make 'em stand up and talk."..track him down myself." "That's so completely radical!" In the gathering shadows that darkened but didn't.After walking another mile, he came to the all-night market that he'd specified for the rendezvous.. "That may be, but it's beside the point that I was trying to make," Merrick said. "Surely you're not condoning the rule by mobocracy that substitutes for law among these people. Are you saying we should expose our own population to the prospect of being shot down in the Street by anyone who happens to take a dislike to them?" "Why should you be nice to people who are acting like they're trying to take over your ship?".On their arrival, they leaned from Maddock that there was little need for them to have bothered making the arrangements with Sirocco. Border security around Phoenix was disintegrating, with most of the SDs being pulled back to protect the shuttle base, the barracks, and other key points, and the regular troops who were left scattered thinly along the perimeter doing little to interfere with the civilian exodus. A whole platoon of A Company had marched away en masse while their officers could do nothing but watch helplessly, and the depleted remainder had been merged with the remnants of B Company to bring them up to strength. More SDs were disappearing too. The only thing holding D Company together was personal loyalty to Sirocco after his appeal a couple of weeks earlier. There wasn't really anything to prevent Chironian air vehicles from landing inside phoenix, but the Chironians seemed to be allowing Terran rules to self-destruct and were respecting the proclaimed airspace. Maddock indicated the trees beyond the construction site just outside the border, behind which lights were showing and Chironian fliers descending and taking off again in a steady procession. "No need for you to walk very far," he told them. "I can call Kath and have her send a cab over. What's her number?"..intrusion..But Lesley was not listening as he gazed down at the platform below, which fanned outward from the arc lights above the lock to become indistinct in the darkness of the antechamber. Figures - were moving slowly from the shadows by the transit tubes and freight rails, spread thinly at the back, but closing up as they converged with the lines of the platform. They were moving carefully, in a way that conveyed caution rather than stealth, and seemed to be avoiding cover

"Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." .Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory..Koontz, Dean R. Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft..
