Not in the usual sense of planning to stay here forever, but all our planning will have to be geared to that fiction. What we're faced with is not a simple matter of stretching supplies until rescue comes. Stopgap measures are not likely to do us much good. Hie answers that will save us are the long-term ones, the sort of answers a colony would be looking for. About two years from now we're going to have to be in a position to survive with some sort of lifestyle that could support us forever. We'll have to fit into this environment.easily reproducible pleasure. [Though Dune is, strictly speaking, science fiction. Wilson was talking about."Come on, crew, we've got a lot of work..".If the first trip had been an ordeal, this one was an agony: a frantic thrust through the sultry night on the steaming river, Moises sweating over the throttle as Nolan held Darlene's shuddering shoulders against the straw mattress in the stern of the vibrating launch. They made Manaos by dawn and roused Dr. Robales from slumber at his house near the plaza.."So we'll put that one in the Fairy Godmother file and forget about it. If it happens, fine. But we'd better plan on the assumption that it won't. As you may know, the E.R.B.-Podkayne are the oniy ships in existence that can reach Mars and land on it. One other pair is in the congressional funding stage. Winey talked to Earth and thinks there'll be a speedup in the preliminary paperwork and the thing'll start building in a year. The launch was scheduled for five years from now, but it might get as much as a year boost. It's a rescue mission now, easier to sell. But the design will need modification, if only to include five more seats to bring us all back. You can bet on there being more modifications when we send in our report on the blowout. So we'd better add another six months to the schedule..".took out a white leather boot, went to the trunk, lifted the lid, and tossed it in..high. With a crew of satisfied programmers, I feel there is nothing we cannot accomplish..Eli didn't see it that way. "Hell, Jake, they'll have to come through," he said. Crawford had thought he would be the only one immune to the inevitable despair of the castaway. Ralston in his laboratory was the picture of carefree detachment, existing only to observe..Zeke brought us the news while we were on picket duty this morning. He came running up to the."Haven't you done enough?" I sighed. "When I called you, I didn't mean for you to push her like that. Couldn't you guess what she might do? "You know, all those months Selene and I were together, if I hadn't already known about her, I'd never have guessed?".Fallows took in the rest of the information from the screen. The changes that the computers had detected were tiny--the merest beginnings of a trend which, if it continued at the present rate, wouldn't approach anything serious for a month or more. With only another three months to go before the ship reached Chiron there was no cause for alarm since the rest of the pump-group had enough design margin to make up the difference even without the backup. But even so, there was little doubt that Merrick would insist on the primary's being stripped down to have its bearings reground, alignment rechecked, and rotor rebalanced again. They had been through that routine twice already in the three months that the main drive had been firing. That meant another week of working in near-zero g and klutzing around in heavy-duty protective suits on the wrong side of the stern radiation shield. "Bloody pump," Fallows muttered sourly..The man rose then, and Hinda marveled at the height of him, for he was as tall as the cottage door and his hands were grained like wood..Now Amos looked over his shoulder too and saw that the white disk was going slowly down..and a rape and knifing in an alley off La Brea. There was a gush of snow and dust; then the floor settled slowly back to the ground. He pushed in a long metal flap at the side of the trunk, very like a mail slot, and slid the moth inside..Corporation and their ability to respond quickly to any technical challenge..
