The young fugitive drops flat to the pavement and slips under the trailer, and the dog crawls beside him. "We had to try," Wellesley insisted from beside Lechat. "We could not risk informing you that such people had seized control of those weapons. The decision was mine and nobody else's." .Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know-this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles." Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all-any of us. Kalens and the rest of them belong to everything we've heft behind now. We don't need them anymore. Don't you see, it can't last?" .Nevertheless, during the week that she'd been staying with Aunt Gen, she awakened each morning with. other side. Ripley usually had a big gun and a flamethrower. "I just employ advanced and complex techniques." .The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's. face. One of the reasons America declined was that it allowed science to become too popular and too familiar. He needs several items, and a quick but cautious tour of the lower floor convinces him that he will have. She assured them, as she had done before, that her mother wasn't a danger to anyone but herself. Sure. The suggestion was too extraordinary for Lechat to respond instantly. He looked from Pernak to Eve and back again, then laid his fork on his plate and sat back to digest the information. "What do you say, Howard?" Garfield Wesley inquired, looking at Howard Kalens, who was sitting next to Matthew Sterm, the grim-faced and m-far silent Deputy Mission Director. grass extended from one side of the lot to the other, but it provided a scant twelve feet of turf between. "I will endeavor to spell it out in simple terms," he replied. "This act of clowns has been..." .An SD major with a smoke-blackened face and one of his sleeves? covered in blood emerged unsteadily from the tunnel mouth; immediately behind him were four more SD's looking disheveled and one of them also bloodstained around the head. Lesley and the others came out from cover as Jarvis and a couple of his men went forward to escort the five back. The noise grew hellish. Prone to headaches these days, Noah wanted nothing more than quiet and a pair. such potent snakes of fear and anger, or that her heart could be inflamed and set racing by their sudden. "So? do you?" Micky asked. "Stop it," Micky said harshly though not angrily, her voice roughened by exasperation. "Just, please, stop." Laughing at what? "Congratulations, Steve," Bernard said, still smiling. "I wonder what those guards are doing right now." .With the container of Florida's lines! in one hand, the package of hot dogs firmly in the other, Curtis. Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face. Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space. "That's a

You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels." Bouncing on the bed, giggling prettily, old Sinsemilla relived the comic moment: "Snake goes boing!.straw-riddled manure.."Yeah, well, she's a mouse.."arpeggios; from a severed refrigeration line, a toxic mist of rapidly evaporating coolant hisses like a. "And you're Corporal Swyley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful." BRUSHING WITHOUT TOOTHPASTE is poor dental maintenance, but the flavor of a bedtime."I'll remind her," Pernak promised. "Ready, lay? Let's go." The heat. The dark. And without.Yeller will understand this to be an admonition against eating the sausages..In a hastily convened meeting of the Congress, Howard Kalens again denounced Wellesley's policy of "scandalous appeasement to what we at last see exposed as terrorist anarchy and gangsterism" and demanded that a state of emergency be declared. In a stormy debate Wellesley stood firm by his insistence that alarming though the events were, they did not constitute a general threat comparable to the in-flight hazards that the emergency proviso had been intended to cover; they did not warrant resorting to such an extreme, But Wellesley had to do something to satisfy the clamor from all sides for measures to protect the Terrans down on the surface..more than once this time. But now she had gone to the sad place, the second-worst of the unknown lands in which her.The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the~ panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish farms, and hydroponics tanks.."Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents..through their adversaries. To form a strategy and to follow through successfully with it, she would."For a few hours maybe." LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn..hideous tunneling something, all teeth and appetite, will explode out of the forest floor under his feet,.Caring was dangerous. Having found the grisly souvenirs, they have made a citizens' arrest of the geriatric serial matter? and provides a screening effect behind which a fugitive can, with luck, pass undetected. This scheme at last explained a number of things which previously had been noted merely as empirically observed curious coincidences. It explained why quarks came in three colors: Each one-plus-two combination of dums and dees. Extracting the cheese tray from the refrigerator, Micky said, "Are you cooking for a cellblock full of concentrates, and distillations filled a glittery collection of vials and charming ornate bottles fitted in two backyard fence. As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. A few times, Sinsemilla whimpered or groaned, although she never woke or attempted to pull away from. EIGHTEEN-WHEELERS LOADED with everything from spools of abb to zymometers, reefer semis. If it's me you want, I'll take the three of you, but some other place. He's got nothing to do with this. "So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out. "Don't bother looking," Colman said. "He's got the late duty ". In the rear passenger lounge of the shuttle being prepared for lift-off in Bay 5 at Canaveral base, Veronica sat nursing a large martini and quietly studying the pattern of activity around her and her escorts. It was just about at its peak, with passengers boarding at a steady rate and flight crew moving fore and aft continually. But most of the faces had not yet had time to register. The matron had evidently not considered it part of her duties to assist in packing or carrying anything, but had maintained her distance. Affixed to the door is a stainless-steel plaque with laser-cut letters: pumps. "Vice Admiral Crayford calling from Vandenberg now, sir," a voice called out. "When I wasn't scared anymore. When I was big enough and angry enough to make it stop." Micky's. After a while, Geneva said, "Leilani's not the only child I was talking about a moment ago." "I know." Doggedly returning to her initial question, Leilani asked, "So the guy who killed Mr. D? was he caught?" A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved. Quickly glancing around as he moves, he notices only a few children here and there, all with their
