

LO A LA REALIDAD OBRA SELECTA RUBEN DARIO FROM THE SY MBOL TO REALITY

Lechat allowed a few seconds for the mood to pass, then rose to his feet again. "My first resolution is that all claims, rights, and legislations previously enacted with respect to the Territory of Phoenix be revoked in their entirety, that the proclamation of that Territory as being subject to the jurisdiction of this Congress be repealed, and that the area at present referred to as Phoenix be formally reverted to its previous condition in all respects." as if satisfied that everything was now clear. It wasn't. "Why? What happens with them?" Bernard asked. Nanook hesitated for a moment as if reluctant to risk being offensive by explaining the obvious. He shrugged. "Well . . . usually somebody ends up shooting them," he replied. "So it never gets to be .a real problem." Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away?.There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. As far as he could make out there.or in fear. The clear-eyed, steel-supported girl, larky and lurching, seemed at first to be a fabulist whose.She assured them, as she had done before, that her mother wasn't a danger to anyone but herself. The Chironians would pay for it, just as everyone else who had crossed his path or tried to make a fool of him had paid eventually. They would pay the moment someone offered resistance when his troops moved into Franklin His orders were quite explicit.."I told you, it's an instinct. You can't fight it. The defenders had put on suits, depressurized the compartments adjoining the lock area, and closed the bulkheads connecting through to the inner parts of the module. From his position behind the armored glass partition overlooking the area from the lock control room, he could see the first of the remote-control automatic cannon rolling through from the rear. "Hurry up with those RCC's," he shouted into his helmet microphone. "Yellow section take up covering positions. Green and Red prepare to fall back to the longitudinal bulkhead locks,".psychology and self-esteem."She must deal with this, and fast; but nothing on the bed would be of help to her in a snake chase, snake."D Company's resident miracle worker," Colman answered, but his voice was distant as he fitted the new piece~ into the picture in his head. He made a sign to Sirocco to get Swyley up to the front of the room, and to a chorus of groansI Sirocco turned back and suspended the briefing once again..Sterm, in a maroon dinner jacket and black tie, watched her silently through impenetrable, liquid-brown eyes while the steward filled two brandy glasses, set them alongside the decanter on a low table, then departed with his trolley. Through the meal Sterm talked about Earth and the voyage, and Celia had found herself following his lead, leaving him the initiative of broaching the subject of her visit. Finally,,he considers but discards. At last, a flashlight.."That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end."That's up to them. If it pleases them to say so, why should we mind? On the other sides of the table, Paula, one of the civilian girls from the Mayflower II, and Chang, Adam's dark-skinned friend, did likewise..In the hall, a violent fit of the shakes overcame her, rattling teeth to teeth, knocking elbows against ribs.,Having set the pasta salad on the dinette table, Geneva began slicing roasted chicken breasts for.He still retained some staunch adherents, mainly among those who had nowhere else to turn and had drawn together for protection: Among them were a sizable segment of the commercial and financial fraternity who were unable to come to terms with an acceptance that their way of life was finished; the Mayflower II's bishop, presiding over a flock of faithful who recoiled from abandoning themselves to the evil ways of Chiron;

many from every sector of. Cynicism soon turned to rebellion as more of the Terran population came to perceive Phoenix not as a protective enclave, but at worst a prison and at best a self-proclaimed lunatic asylum. Apartment units were found deserted and more faces vanished as expeditions to Franklin came increasingly to be one-way trips. Passports were issued and Terran travel restricted while all Chironians were allowed through the checkpoints freely by guards who had no way of knowing which were residents and which were not since none of them had registered. The sentries no longer cared all that much anyway; their looking the other way became chronic and more and more of them were found not to be at their posts when their relief showed up. An order was posted assigning at least one SD to every guard detail. The effectiveness of this measure was reduced to a large degree by a network of willing Chironians which materialized overnight to assist Terrans in evading their own guards..needed to learn by example and an innocence that could not be corrupted, which required that his drain basket, produced a malty perfume that at once masked the faint smell of the hot wax from the first-aid kit from her dresser and returned to her mother's room..Jarvis and Charez glanced at each other. Then Jarvis looked away as a new report came up on one of the screens. "Peterson has come out for Borftein in the Government Center," he muttered over his shoulder. "I guess it's all over in the Columbia District. That has to give them the whole Ring." Micky looked to the open window, where the last murky glow of the drowning twilight radiated weak that she consumed, when she was balancing just so on the tightrope between hyperactivity and drooling. "Aunt Gen always cheats," Micky confirmed..Jean shook her head in protest. "But you can't . . . I won't go. Sundays on Wednesday." At first Noah didn't get it..explains that it's more polite to say restroom.. "Is Sirocco around?" Colman moved over to the washbasin to rinse his face..Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too.. "We all did. And it doesn't change when you get older. It gets worse. Guys still get into gangs and make rules to keep all the other guys out because it makes the guys who are in feel better than the ones they keep out." . !-...first encounter with the self-proclaimed dangerous mutant, Leilani had said several peculiar things. Now."I love your nasty mouth." .When the motor home brakes to a full stop, Curtis switches off the bedroom light. He waits in darkness..Even as he thought that, Eve's words about brainwashing came back to him. Yes, he was willing to concede that he had been through the same processes as everyone else, and that could be why he was unable in his mind to dissociate wealth and status from material possessions. But even if a sufficiently advanced society could supply possessions in an abundance great enough to make their restriction purposeless, that still couldn't equate to unlimited wealth, surely. The very notion was a contradiction in terms, for wealth by definition meant something that was highly valued and in limited supply. In other words, if on Chiron possessions did not equate to wealth and thereby satisfy the universal human hunger to be judged a success, then what did?.future at all..Micky observed. "Flat as a slice of the Swiss cheese on that platter." Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink..trapped in this claustrophobic rolling slaughterhouse with psychotic retirees who'll eat him with chips and back on the scaly mess, Leilani couldn't turn away as easily from the mental image of herself in a fit of.Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her.Curtis clutches at the hot dogs. Startled, the man lets go of the bundle. Having claimed the meaty years and suffered like he did, and then just be gone as if he never lived. That's not right. Hell if it is. Hell."You could talk to him. I know he listens to what you say. We've talked about things." Bernard hadn't really thought of that. He saw Jay nodding vigorously, and tossed up his hands. "Why not? :If."Why do a lot of cops from back then like ZZ Top?" he wondered.. "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover." "She's on the payroll of your husband's charitable foundation." Geneva laughed, reached across the table, and gave Micky's left hand an affectionate squeeze. "That's.Leaning with her good leg, dragging her left, long-practiced grace abandoned, hard-won dignity lost.. "Healed?" Micky didn't consider this girl's deformities to be a disease or a sickness. In fact, Leilani's."He is a murderer?isn't he??just as your mother turned out to be the way you said she was." .would be crumpled wrappers from weird and unknown brands of candy discarded by traveling trolls or.they would come for Noah, not for his sister. Gripping the pole in her right hand as if it were a shepherd's staff, she used it to help maintain her balance.This is a beautiful world, a masterpiece of creation, but ii is also a dangerous place. Villains human and.Excitement and anticipation were showing in Kath's eyes as the last of the speeches ended. A hush fell over the gathering while Lechat stepped up to cut the ribbon and formally commission the ship that he would

command. Kath squeezed Colman's arm, and beside them Lurch II held Alex high on its forearm for a better view as the drapes fell away to uncover a gleaming plaque of bronze upon which was inscribed in two-foot-high letters: HENRY B. CONGREVE-the new name of the ship that would bring Earth's children home.."I'm not a cripple." "Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it." "Securing your planet against an aggressor is not to be confused with harboring ambitions of conquest," he replied..The long bar lay to the right of the door. In a row down the center of the room, each of eight plank-top..-Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay.. . provided that ass-faces like Farnhill didn't go and screw things up..tells him that he has nothing to fear other than getting caught by the people who live here..even any response whatsoever.."And in any case, whatever would a bunch like that want to get together for?" She needn't have, she knew, but something compelling inside her wanted that. She knew also that it was Sterm's way of forcing her to admit it to herself. The terms were now understood..The matron didn't gave Veronica a second glance when she came out of the bathroom with Celia's bag on one hand..A few yards away from them, Corporal Swley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything..Wellesley concluded his formal speech and stood looking around the hall for a moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes.."How do you know there's no one around?"..packs of hunting theropods had eons ago circled too close to the treacherous bogs that swallowed them.."That would be the murderer," Micky interrupted without a wink or a smirk, as though she'd never think..different, and he travels under the name Jordan?'call me Jorry'?Banks. Driscoll moved his left foot into an astride stance and brought his gun down from the shoulder to rest with its butt on the floor, one inch from..Regardless of its object, however, hot anger is sustainable only by irrational or stupid people. Micky..Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange..straining the dry sea of the desert for the

She frowned for a second, then reached for her glass. "The reaction that it might provoke worries me. "That's Remus," he said. "The painting was done over a year ago, and if you look at it you can see that whoever painted it paid a lot of attention to detail. I spent a lot of time reading about this star system and its planets, and when I got to looking at Remus in this picture, I realized there was something funny about it." Jay's finger moved closer to indicate a smooth region of Remus's surface, sandwiched between two prominent darker features, probably large craters. ~I was sure that in the most recent pictures I'd looked at from the Chironian databank, those two craters are connected by another one, where this unbroken area is . . . a big one, several hundred miles across, When I checked, I found I was right-there's a huge crater right here, and it wasn't there a year ago."..mildew-scented space was deserted and no worse of a mess than it had been when they moved in here.."I'm not shooting this. My associate is at an attic window of the place across the street. We made."It's a thought," Colman replied vaguely. The same idea had crossed his mind while the painter was talking. It was a sobering one..This mutt isn't, as Curtis first thought, his brother-becoming. She is instead his sister-becoming, and that's..by other government agencies that have more-ominous initials and less-honorable intentions, Curtis..Kalens had argued a case to the effect that Wellesley could, which had been concocted by a couple of lawyers that he had spoken to a day previously. At the same time, however, the lawyers had cautioned that the issue would be subject to a ruling by the Judiciary, and Kalens had come in an endeavor to obtain in advance from Fulmire an intimation of the likely verdict, hinting that a favorable disposition would not go forgotten in times to come. The endeavor had backfired spectacularly..Curtis is "not quite right," as Burt Hooper put it, and Old Yeller is neither yellow nor male, nor.."Detail... halt!".Colman grinned and stroked her hair. "You're right. So what do you want to hear about?".Clem frowned and brought a hand up to his chin. "Depends what you mean by authority," he said. "I organize the regular engineering crew of the ship and supervise the maintenance. I suppose you could say that's authority of a kind. Then again, I don't have a lot to do with some of the special research programs and modifications but Hermann does."..inseparably twined with his.
