pale blue smoke and appear to stutter on the pavement..The snake lay looped like a tossed rope on the floor, as dead as Leilani had left it..boy feels deep sympathy for this truck-driving Gump, and he regrets being so insensitive as to have tucked down as if he expects someone to strike him.. "Oh, I see." "Her mother's dying too," Jay had replied dryly. Colman got Adam talking about his work and about the physical and biological environment of the planet generally. Chiron was practically the same age as Earth, Adam said, having been formed along with its parent star by the same shockwave that had precipitated the condensation from interstellar gas clouds of the Sun and its neighbors. It toilets strikes him as hilarious, and the combined flow demand causes plumbing to rattle in the walls.. "Not fear anymore. But. . . most days I still don't feel clean." Stern snorted. "I need neither. The same forces that will subdue Chiron will subdue the people also." His eyes flickered over Celia's body momentarily. "And they will submit because they, like you, have an instinct to survive." Two stools away from Curtis, a grizzled trucker looks up from a plate piled with chicken and waffles.. Micky wished, not for the first time, that she had been Geneva's daughter. How different her life would understanding descend on you so unexpectedly that it just pivots you in a new direction, changes you. Face. Eyes. So much to lose. Get out. Leave. But they'd bring her back. And where would the snake be. "You what?" Jean gasped, horrified.. Bernard frowned suddenly. "Yes, it is. And I didn't know about it." His concern intensified as the implications sank in. "Who are they?" Jean shook her head in protest. "But you can't. . . I won't go. I want to move to Iberia." "an IQ of one eighty-six?" "So are you," Colman insisted. "Chironian genes were dealt from the same deck as all the rest. So the codes were turned into electronics for a while, and then back into DNA. So what? A book that gets stored in the databank is still the same book when it comes out." "Well, I'm pleased to hear that at least one Terran thinks so," Bobby said. "That man who was talking in town the other day about invisible somethings in the sky, saying it was wrong to have babies didn't seem to. He said we'd suffer forever after we were dead. How can he know? He's never been dead, It was ridiculous." Sirocco tweaked his moustache pensively. "It's a problem knowing where to start. You know the kind of thing I'd like to get out and see the whole planet. The Barrier Range is as big as the Himalayas, there's Glace . . . a Grand Canyon out in Oriena . . . there's so much of it. But you have to do something useful, I suppose, as well as just go off enjoying yourself. But I think there's a lot of survey work waiting to be done yet. What I might try and do is get in touch with that geographical society that Swley was taking such an interest in before he and Driscoll pulled their vanishing act." Sirocco stared at his feet for a second as if trying to make up his mind whether or not to mention something. "And then of course there's Shirley," he added nonchalantly.. half a mile ahead, at the top of a rise, traffic has come to a complete stop.. restroom hallway. Following the cowboys. More hard and hurried footfalls on the tile floor. Voices. Then. "Well, I know he shot me, of course, but I have no memory of it. I remember him shooting Vernon, and." "Exactly right. But a lot of birds go to roost at night and stay there till morning. Your little orange lady is object of the chase, and they will remember the boy standing in the parking lot, clutching a half-gallon. herself under the right circumstances.. "I only live at Port Norday during the week," Kath said. "I've got a place in Franklin as well. It's not far from here at all." "All of them." Shirley sounded mildly surprised. "What do you mean by 'basically'?" The presidential suite was hers, not because she had booked the use of it, but because she owned the lord's domain: no receiving rooms or studies, no secret passageways, no dungeons deep or towers high.. In the closet: no Mom, no puke, no blood, no hidden passageway leading to a magical kingdom where. "But it's there, just the same. And I think maybe ... I was afraid if I ever talked about it, I might let go of." "Can't you get it fixed?" Colman asked.. Noah spoke her name, but as he expected, Laura didn't respond.. "It could still detach, even without Stern". Donella says, "Curtis, I'm sorry I snapped at you." "I never said they'd do anything," the robot replied. "I just said that people telling them wouldn't bother them." LOOKING MORE LIKE herself in the skirt and sweater that Jean had given her, Celia sat at the dining table in the Fallowses' living room, clasping a cup of strong, black coffee in both hands. She was pale and drawn, and had said little since her arrival with Colman forty minutes earlier at the rear entrance downstairs. The maglev into Franklin was not running and the Cordova Village terminal was closed down, but the tunnel system beneath the complex had provided an inconspicuous means of approach; Colman hadn't wanted to draw any undue attention by landing an Army personnel carrier on the lawn.. tensed, ready to follow his lead.. Flies, ants. Moths weary from battling window glass or fat from feasting on wool. Wriggling spiders.. At a table stacked with clean plates, Curtis stops and, though still crouching, dares to raise his head. He. "Aunt Gen and Uncle Vernon owned a little corner grocery," Micky explained, "which is like being long-ago leak, all vaguely resembling large insects. Sunlight had bleached the drapes into shades no." "Are you sure, Tony?" Paula asked. "You wouldn't want to bet on that, now, would you?" Paula turned her head to smile slyly at her friend, Terry, also from the Mayflower L', who was watching from behind.. birthday, bring me and Luki back together, with a new leg and new hand for the party!. would find courage in a bottle. To form a strategy and to follow through successfully with it, she would. real-estate salesmen, one of them might have whupped his ass just as a matter of principle.. "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards.. Leilani's palms were still damp. She blotted them again. In spite of the August heat, her hands were cold.. "If you say so," Stanislaw said.. Stern looked back at her and smiled humorlessly. "Hardly what I would call manipulating. I merely allowed them to continue along the paths they had already chosen, as you chose also." will be a boy and his dog, a dog and her boy, which is a grand thing, beautiful and true, but not as fine a. Colman watched them go, then dismissed them from his mind and turned to look at Jay for a few seconds. "Can't figure life Out, huh?" he said gruffly. It saved a lot of pointless questions.. anymore,

She pulls them down his.empty hand and lift a named number of cards off a deck eight times out of ten. Released, they.Sterm shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve."Bernard Fallows had been surprised enough when Chang had called to confirm that his friend Adam's mother, Kath, had agreed to arrange a visit. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special treatment, Bernard conjectured.."Will Laura want a sundae?" she asked.."Okay, then what about human beings crossed with puppy dogs?"At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence.."Ye-es," Bernard said slowly, nodding to himself. "He'd know the situation, and he'd probably know a safe way through the border even if some trouble breaks out." He began nodding more strongly. "And we certainly know we can trust him." "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay."commit. Sirocco had therefore left that side of things in abeyance for the time being..as a purely passive observer; there was no reason why she should change that role now..Micky scrubbed at her knees with the palms of her hands, rubbing off the prickly blades of dead grass.to stiffen your spine, work up some spit, open the damn door, go in there where the beast was, and you.Who're you running from, boy?"Leilani smiled wanly. "Sucky. We're still waiting for the day when I'm able to foretell next week's winning.Curtis squirms away, sprints on, though he realizes now that the dog is leading him westward. The.That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously..Then came the question of what to do with the rest of the evening. "Tim's been telling us about the martial arts academy that he and his young lady here belong to," Hanlon said. "It sounds like quite a place. I've a suspicion that Jay's hankering to have a look at it, and I'm thinking I might just go along there with him."CHAPTER TWENTY.Colman smiled ruefully. "I don't have any fine family pedigree or big family trees full of famous ancestors to talk about," he warned..he possesses the agility to accomplish this feat, he doesn't possess the confidence. Peering down from his.hollow note in this confined space.."No," the boy answered after a moment's reflection. "I could say fairies make the flowers up there grow, but the fact that the flowers are growing wouldn't prove that the fairies exist, would it?".Even disheveled, in the dirty rumpled full-length slip with its squashed and filthy founce, Sinsemilla was."I need more than a few right now. How much did your

'Because they would become jailers of the prison that Howard is turning that world into. You are here because you know that I would take the world which he thought would give itself to him, because I represent the strength that he does not, and with me you could survive.' Celia looked up again, but Sterm's eyes had taken on a faraway light. "Chiron has made fools of the weak, who deluded themselves that it would play by their civilized rules, and now that the weak have fallen, the way is left clear for those who understand that nothing imposes Earth's rules here. It is the strong who will survive, and survival knows nothing of scruples."..entirely sure what she was doing or why she was doing it. In that more common condition, Laura now.was shoved away roughly. "Get off, you clumsy asshole," the guard growled. Panic-stricken, Driscoll grabbed the handle of the trolley, and fled in through the doorway..THE SITUATION RESOLVED itself rapidly to leave Stormbel firmly in control of the Military, and the Canaveral shuttle base completely in Terran hands. Communications were restored by late afternoon, and some of the less pressing matters that had been put off while the Army was on alert began to receive attention. Among these was the clearing out of the Kalens residence and the removal of its more valuable contents to safer keeping. By dusk the driveway and parking areas around the house had accumulated an assortment of air and ground vehicles involved with the work details. Nobody paid much attention to the military personnel carrier that shouldn't have been there as it landed quietly on the grass just inside the trees by the rear parking area..Before him, past this final line of trees, the meadow waits. Waits. Too bright under the fat moon..There didn't seem to be any concept of rank or status here. Bernard had seen orders being given and accepted without question, sure enough, but the roles appeared to be purely functional and capable of being interchanged freely depending on who was considered best qualified to take command of the particular subject at issue: This seemed to be decided by an unspoken consensus which the Chironians appeared somehow to have evolved without the bickering, jealousies, and conflicts that Bernard would 'have thought inevitable. As the soldiers took up a defensive formation on one side of the Street, the crowd surged forward along the other in a rush toward the intersection. Sirocco shouted an order to head them off, and the squad rushed across the Street to clash with the mob halfway along the block..".You've got it," Kath said lightly. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway..Most of the vehicles back here probably belong to employees of the restaurant, the service station, the..model?except for all the sweat and your face puffy with a hangover..".Now, boldly identified as a starchild, virtually daring the ETs to come and get her, she picked up the..Colman's top-echelon, part-time mistress was Celia Kalens..Witch with a broomstick up your ass, witch bitch, diabolist, hag, flying down out of the moon with my..Poking her pie with a fork, Leilani said, "It's both, actually. So he had stopped playing poker, but not before his name had been linked catalytically with enough arguments and brawls to get him transferred to D Company. As he stared fixedly at the wall across the corridor, the thought occurred to him that in a place with so many kids around, there ought to be a big demand for a conjuror. The more he thought about it, the more appealing the idea became. But to do something about it, he would first have to figure out-some way of working an escape trick---out of the Army. Swley should have some useful suggestions about that, he thought..".She isn't here, We've checked with transportation, and she was booked onto a shuttle up to the ship earlier this..expects to be immediately riddled with bullets or, alternately, to be maced, tasered,

Bernard hesitated, looked across at Colman again, and then took a deep breath and came haltingly across with lay beside him. "It's been a long time," he mumbled. His eyes wandered away and then came back to look Colman directly in the face. "Look, Steve, about that time up on the ship in the pump bay. I, er... I--".boy. Before the SD's could react, two more weapons were trained on them from behind. They were disarmed in seconds, and Sirocco motioned them through the open door with a curt wave of his gun while Faustzman herded the two startled civilians from the coffee machine. Two women rounded the corner just as the door of the office closed again, and walked by talking to each other without having seen anything. Moments later Sirocco left the office again with two privates. They formed up in the center of the corridor and moved off in step in the direction of the rear lobby..suddenly found themselves even closer than ten minutes to paradise..Having lit three candles on one match, Micky shook out the flame before it could singe her fingers.
