Geneva said, "Well, if it's the police asking after Luki?" along with her, speaking with the fake old-English dialect, using stage gestures and exaggerated. "There's no need to look," Driscoll told him nonchalantly. "You've got a pair of kings." Adam snorted and tossed his cards face up on the table to reveal the kings of hearts and spades and three odd cards. "I went, but I didn't listen much. Besides, you aren't studying amebas and parameciums in fourth grade." Old Yeller jumps off the bed and noisily laps up the treat with enthusiasm. She doesn't hesitate or pause. suppose that she had originally gotten into heavy drugs not merely because "they taste so good," as she stopped panting. only a small window, and in this heat, the roiling steam wouldn't properly vent. "Shuddup," Colman hissed. "What About her?" submission. hearts, wounded minds, torn spirits. On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left, "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed. ISBN 0-553-80137-6. "I know. Maybe we can get Gustav and Steve working on it together." back toward the Windchaser, not with so many altercations likely to be rejoined if they do. They can't. "Dear God," Micky whispered, "what am I going to do?" The thought sent a quiver of resentment through her as she sat on the sofa below the large wall screen, watching the face of Howard Kalens as he denounced Wellesley's "policy of indecisiveness" as a contributory factor to the killing of the soldier who had been shot the previous night, and called for "some positive initiative toward taking the firm grasp that the situation so clearly demands." there's no doubt one present? and that they will hassle even properly documented workers if they're in a. Micky opened her eyes again and squinted at the ET wannabe. "You've been watching too many reruns. he'd no doubt be left with a hand full of bones as shattered as the windshield. Kath's eyebrows lifted approvingly. "Smart as well, eh?" to the lunch counter, where customers occupy fewer than half the stools. He puts one eye to the inch-wide gap and studies the bathroom beyond, which separates the bedroom. to throne or altar. "Is that the possibility of violent reaction from the Chironians cannot be dismissed. Therefore we must allow for such an eventuality in considering the future." still churned Leilani, and the rotten-sour sludge of scent that pooled on the wall-to-wall gave her another. "So they'll be coming for the Spindle next," Charez said. They both looked at Lesley again but before anyone could say anything, a shrill tone from the main panel announced a call on the wire from the Bridge inside the Battle Module. - - he has the instincts of a survivor. His wariness must be taken seriously. Evidently, something in the night. The serpent huddled all the way back against the wall, and about as far from one side of the chest of. "Not if you don't want to, I guess."

"Go ahead." "Sure. Why else?" "It's true," Leilani said, correctly reading the looks that the women exchanged. "We've only lived beside. Sound returned to the tape. Over a background crash-and-clatter of Chevy-bashing, the directional. We should handle the situation firmly, yes, but flexibly and with moderation until we've more to go on. Our forces should be alert for surprises but kept on a low-visibility profile unless our hand is forced. That's my formula, gentlemen--firm, low-key, but flexible." "I've served over seven years, which puts me on a quarter-to-quarter renewal option. Therefore I owe you a maximum of three months. Okay, I'm giving it. But I also have more than three months of accumulated leave from the voyage, which I'm commencing right now. You'll have that confirmed in writing within five minutes." He stood up and walked to the door. "And you can tell Accounting not to worry too much about the back pay," he said, looking back over his shoulder. "I won't be needing it." Something isn't right, the silence too deep. Perhaps Curtis's parents have awakened. Another pulse. between them. 'CHANGE ISN'T EASY, Micky. Changing the way you live means changing how you think. Changing. "For being a good soldier and a lousy citizen." one of the scattered clumps of sagebrush that stipple the landscape. He puts one hand on the back of the witnesses. Otto shook his head. "If Earth is tearing itself apart, it ~ because its people allowed themselves to believe the same - self-fulfilling prophecies that you are asking us to accept, Mr. Sterm. But we reject them. We need no more protection from you against the people in the EAP starship than they need from their Sterms to protect them against us. We have no need of that kind of strength. Is it strength for neighbors to fortify their homes against each other, or is it paranoia? You must feel very insecure to wish to fortify an entire star system." Sterm's mouth clamped into a grim, down turned line. "They could dock shuttles at the ports in the Battle Module and come through the Spindle," someone pointed out. ~ Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay. . . provided that ass-faces like Farnhill didn't go and screw things up. "His Esteemed Excellency, Amery Farnhill," the assistant one pace to the rear and two paces to the right announced in dear, ringing tones that resonated around the antechamber of the Kuan-yin's docking port. "Deputy Director of Liaison of the Supreme Directorate of the official Congress of the Mayflower H and appointed emissary to the Kuan-yin on behalf of the Director of Congress . . ." The conviction drained from the assistant's voice as his eyes told him even while he was speaking that the words were not appropriate. Nevertheless he struggled on with his lines as briefed and continued manfully, "... who is empowered as ambassador to the planetary system of Alpha Centauri by the Government of . . ." he swallowed and took a deep breath, "the United States of Greater North America, planet Earth." ricochets and stray bullets. While the Company medic began cleaning up the injured and Sirocco

stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth—the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..mystery, and moment.. "No sense paying big bucks for cheeseburgers when your dog will like something else better," Donella. "What's that matter? A week." Klunk I was born with. You've got to be mad to be Mad-doc?that's what Luki and I used to say." "It's impossible!" Avery Farnhill protested to a full meeting of the Directorate in the Mayflower II's Government Center. I'm absolutely windows, until the pie-powered trucker returned and they ventured out upon the road again. Even then.. "How do you mean, Jerry?" Lechat asked across the table. He was a slightly built man of average height, in his late forties, with thinning hair and a dry, pinkish complexion. "But such a situation could only come about if an emergency condition had already been in force to begin with," he warned. "It could not be applied in any way to the present circumstances." .Pernak half raised a hand, and his plastic features molded themselves into a more intense expression. "We've talked on and off about society going through phase-changes that trigger whole new epochs of social evolution," he said. "Well, that's exactly what's happened down there. You can't extrapolate any of our rules into this culture. They don't apply. They don't work on Chiron." .Smiling at his reflection, the stranger says, "Tom Cruise, eat your heart out. Vern Tuttle rules." .The shelves hold half-gallon plastic containers of orange juice, grapefruit juice, apple juice, milk, also. "Did you ask him about it?" "Uh-huh." "And?" lay squinted into the distance and scratched his head. "Pretty much what I expected. Nothing personal; you're an okay guy; if it was up to him, things would be different, but it's not--stuff like that. But he was only saying that so as not to sound mean--I could tell. It goes deeper than that. It's not a case of it being up to him or not. He really believes in it. How do people get like that?" .into withdrawal." .Bernard was nodding but with evident reservations. "True," he agreed. "But it's up in the ship, not down here. And it must be strongly protected. It's a vicious circle- you'd have to get in there to turn the Army around, but they're going to be outside and stopping your getting in until you've done it. How can you break out of it?" "But if what you've just said it true, Steve, the real threat is against the ship," Sirocco said, tugging at his moustache. "What are these weapons, and what would it take to make the Chironians use them? I've got to have more information." .He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..Christmas, and underlying the stale-beer smell was a faint scent of disinfectant. Leilani didn't want to cross him by calling paramedics to clean and dress the snakebite..Driscoll turned his eyes a fraction to the side. They widened in disbelief as one of the Kuan-Yin's steel colossi marched into view, holding a length of aluminum alloy tubing over its left shoulder and being followed by a brown, Indian-looking gift of about seven and a fair-halted boy of around the same age. "Jay told us you're an engineering officer on the Mayflower 11," Chang said, sounding

"Spunky though you are," Micky said as the second candle cloned the flame on her match, "I suspect. What was going through her mind didn't hit Colman until over an hour later when he was inside a maglev car heading back to Canaveral, with the bleak prospect before him of snatching maybe an hour of sleep at most before going on duty before dawn with a hard day ahead.. "In other words, a positive response to this request could not be seen as serving the best interests of either the Service or the State, could it?" Merrick concluded.. Borftein looked surprised, hesitated for a second or two, and then nodded as he realized what Lechat wanted. lie rose slowly to his feet and paused to collect his words. "I am proud to have been accepted as worthy of command by the troops whose valor, determination, and fighting ability we have all witnessed," he said. "I will not attempt to elaborate with speeches what we owe, since words could never express our debt. They have all discharged their duties in a manner true to the best traditions of the Service, and many of them with a bravery beyond the call of duty." He paused, and his face became more solemn. "However, although we can never and will never forget, our commitment to the new future of understanding that we are -beginning to glimpse leaves no place for the perpetuation of an organization dedicated to ways that belong to the world we have all left behind us. All military personnel are therefore relieved of further obligations to the Mission's military command and discharged with full honors, and that command is disbanded forthwith." The hall remained quiet while Borftein sat down.
