No one could agree which area was most worthy of study: plains or canyon. So this site had been chosen as a compromise. What it meant was that the exploring parties had to either climb up or go down, because there wasn't a damn thing worth seeing near the camp. Although Morone's charged more for most items, Barry preferred sbdpping there because it offered such a limited and unchallenging range of choices (cold meats, canned goods, beer, Nabisco cookies) that he never felt intimidated and ashamed of his selections at the check-out counter. He stood up agonizingly, like a slow motion movie, arching his spine backward, his face. A clone is any organism (or group of organisms) that arises out of a cell (or group of cells) by means other than sexual reproduction. Put it another way: It is an organism that is the product of asexual reproduction. Put it still another way: It is an organism with a single parent, whereas an organism that arises from sexual reproduction (except where self-fertilization is possible) has two parents. up.
