

THE MIND OF CHRIST

Stanislau stood back from the compack and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislau had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck." Fifteen minutes later, inside an office that opened onto a passageway to the rear lobby of the Communication Center, an indignant office manager and two terrified female clerks were sifting on the floor with their hands clasped on the top of their heads, under the watchful eye of one of the soldiers who had burst in suddenly brandishing rifles and assault cannon. "What do you think you're trying to do?" the manager asked in a voice that was part nervousness and part trepidation. "We don't want to get mixed up in any of this." Nevertheless, standing erect, the boy wishes the trucker would go away, but he can't think of a thing to thoughts. Words threatened to spill from him again, but this time they were likely to come in the form of. "I didn't know you had a thing about little girls, Steve," Anita teased. "You don't look the type." Hanlon roared and slapped his thigh. Racing away into the night, trying to outrun the screams and the guilt that they drill into him, the boy every time." Finally he smiled. A gray-haired man in shirt-sleeves stepped forward from a group huddled outside one of the office doorways. "I am," he said, "McPherson-Communications and Datacenter Manager." After a short pause he added, "At your disposal." "Leave the house. Sleep in the yard. Let Dr. Doom deal with the mess if there is one..up here"?she tapped her right temple?"and sometimes old movies seem as real to me as my own past." lot like her." don't you go on after the others. I'll catch up later." You don't want me around?". CHAPTER EIGHT. "Aw, cut it out, Hoover," Rastus told the robot. "These people have only just arrived. They've got more than enough to do." He looked at the Terrans. "This is Hoover. He runs the place. Don't pay too much attention or you'll end up buried in junk up to your eyes." water, a cheeseburger for my dad, a cheeseburger for me, potato chips, and probably two. At that moment one of the Chironian girls from the group in the corner took Swyley lightly by the arm. "I thought you were getting some more drinks," she said. "We're all drying up over there. I'll give you a hand. Then you can come back and tell us more about the Mafia. The conversation was just getting interesting." This didn't mean anything, either. Sinsemilla liked to sit alone in the dark, sometimes trying to. Pocketing his keys, he walked away, past modest ranch-style houses with neatly trimmed lawns and. I thought you might need a hand with these so I did them last night. If my hunch is right, things have probably gotten a bit difficult for you. There's no sense in upsetting people who don't mean any harm. Take it from me, he's not such a bad guy.. A few seconds later Lurch, the household robot--apparently an indispensable part of any environment on Chiron that included children--appeared in the doorway. "It slipped," it announced. "Sorry about that, boss. I've wired off an order for a replacement." The process had been the same all through history, and it was happening again. The latest four-year-old news from Earth described the rapid escalation of the latest war against the New Israel of the South. Only this time the EAF was getting involved. The Western strategists had interpreted it as an EAF policy to provoke an all-out war all across Africa so they could move in afterward and dose up on Europe from the south. Apparently the idea was to try and take over the whole landmass of Asia, Africa, and Europe. Why did they want to take over the whole of Asia, Africa, and Europe? Colman didn't know. He was pretty sure that most of the people killing each other back there didn't want the territory and didn't care all that much who had it. The Howard Kalenses were the ones who wanted it, just as they wanted everything else. Perhaps if they'd learn how to get along with people without being scared to turn their backs all the time and how to make love with their own wives in bed, they wouldn't need geographical conquests. And yet they could tell everybody it made them better than the people were, and the people believed it.. swung, and his upper lip was nearly as long as his ponytail.. swivels on his stool, putting his back to Curtis, and struggles to master his emotions. Although to all light instead of retreating from it.. "What other way is there?" Lechat Eked.. some demented children's book? The Little Snake that Could? then she was screwed.. "Her name's Karla Rhymes," Noah reported. "When she worked as a dancer, she called herself Tiffany. Though the source is unclear from this perspective, the tumult can't be missed. Fleeing customers are dividing the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Charez watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? What are those alarms? Lesley, do you hear me?". "I don't know," Brad replied. "I haven't been in on it at the top level. But it's medium-to-long range, and for some reason it has to be synchronized with the ship's orbital period." The dog's Hanks shudder, striking sympathetic shivers in the boy. Punctuating its panting are pitiful yellow-and-white uniform cap that could be easily mistaken for a resting butterfly.. folks, but it's a warm bath for others. You'll find work, sweetie." Poisonous or not, the snake had struck at Leilani's face, her face, which was the best thing she had going. "Like what?" Nanook asked.. Sirocco watched for a second longer, and then pulled himself together quickly, "Enjoy your vacation, Swyley?" he inquired with a note of forced sarcasm in his voice. "Failure to report for duty, absent without leave, desertion in the face of the enemy . . . the whole book, in fact. Well, consider yourselves reprimanded, and sit down. There's a lot to go over, and we're all going to need some rest today. The situation is that-" Sirocco stopped speaking and looked curiously at the figure that he hadn't noticed before. Quickly glancing around as he moves, he notices only a few children here and there, all with their know." by other government agencies that have more-ominous initials and less-honorable intentions, Curtis after the dog. Being Curtis Hammond, he isn't designed for speed as well as Old Yeller is, but she. Adam threw up his hands again. "The kids won't let me! They say it wouldn't be the same any other way. What can you do?". Wellesley and the Congress had tried to perpetuate the same injustices by eclipsing him with Borftein because he

in4p't graduated from the right places or possessed the right credentials. They had tried to fob him off with the command of what they had seen as a proficient but small and unimportant corps of specialists. They had all paid too. Now they all knew who he was and where they stood. He had no regrets about Ramisson's death; it underlined the lesson more forcefully than any words could have done. He was only sorry he hadn't made a cleaner sweep by shooting them all..when the driver and his associate stopped to refuel and grab breakfast..He wishes that he'd returned for her and had bravely spirited her to safety. This is a ridiculously romantic.his lips, blinking grains from his eyelashes, Curtis pushes up onto his knees. If his mother's spirit abides.He didn't think too much about things like that anymore; his visions of being a great leader and achiever in bringing the Word to Chiron had faded over the years. And instead . . . what? Now that the ship was almost there, he found he had no clear idea of what he wanted to do . . . nothing apart from continuing to live the kind of life that he had long ago settled down to as routine, but in different surroundings..Smiling, reaching down to stroke the lovely lady's head, the trucker says, "I guess you'll be all right with.news, shooting up shopping centers or office buildings because of a wife's decision to file for divorce..Have you made your mind up about Sterm?" Cells asked..They soon find out," Juanita said it as if it explained everything..Of course they are. It's all a mess up there..Maybe dogs aren't capable of feeling humiliated. The boy's never had a dog before. He knows their.she sat. "But, sweetie, I remember so clearly . . . the wonderful satisfaction of shooting him..Chapter 4.Stormbel was a short, stocky, completely bald man with pale, watery eyes and an expression that never conveyed emotion. A thin moustache pencil-lined his upper lip. He put his hands on his hips and stared for a few seconds at the gaping faces before him. "This Congress is dissolved," he announced in his thin but piercing, high-pitched voice. "The Mission is now under the direct command of the Military." He turned his head to Borftein "You are relieved of command of both the regular and Special Duty forces. Those functions are now transferred to me..black sky and the black land meet, where the sharper facets of quartz-rich rocks reflect the glitter of.with." Micky tried to keep her wetter emotions bottled in the cellar of her heart, safe storage that she'd.Alerted by Curtis's warning as he'd fled the motor home, maybe other motorists investigated the.force her to reveal her vulnerability before Sinsemilla..small, though it isn't beyond the realm of possibility..No. She's wasted on crack cocaine and hallucinogenic mushrooms. The only way old Sinsemilla could.Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?".Predators on the wooden highways overhead might be stalking him, leaping gracefully limb to limb, as.ready..Colman looked away in exasperation. She could have been a unique, thinking person. Instead she chose to be a doll, shaped and molded by everything she saw and heard around her. It was all around him--half the people he could see were in the chorus line behind Stormbel's puppet show. They could be told what to think because they didn't want to think. Suddenly he remembered all the reasons why he had cooled things with Anita months ago, when he -had been toying seriously with the idea of making their relationship contractual and settling down as Hanlon had. He had tried to tune into her wavelength and found nothing but static. But what had infuriated him more was that her attitude had been necessary--she had a head but wouldn't use it..isn't it. It's just a phase. She'll get over it. "I hope so," Celia murmured..trackers on his trail. Fortunately, this blunder will not be the death of him..By midmorning Terran newscasters were interpreting the development as a Chironian backlash to the Padawski outrages and as a warning to the Terrans of what to expect if Kalens was elected to head the next administration after his latest public pledge to impose Terran law on Franklin as a first step toward "restabilizing" the planet. Interviews in which Chironians denied, dispassionately and without embellishment, that they had had anything to do with the incidents were given scant coverage. Reactions among the Terrans were mixed. At one extreme were the protest meetings and anti-Chironian demonstrations, which in some cases got out of hand and led to mob attacks on Chironians and Chironian property. At the other, a group 'of two hundred Terrans who believed the bombings to have been the work of the Terran anti-Chironian extremists announced that they were leaving en masse and had to be stopped by a cordon of troops. Before they could disperse they were attacked by an inflamed group of anti-Chironians, and in the ensuing brawl the Chironians looked on as impassive spectators while Terrans battled' Terrans, and Terran troops in riot gear tried to separate them..extraterrestrials to show up. Then for Sinsemilla's delight, the doom doctor would concoct a.searching, cunning and indefatigable..I'm not in fourth grade," Leilani said, pouring the warm beer into the sink. "We're twenty-first-century.Later on, Colman thought about Anita being brought back in a body-bag because she had chosen to follow after a crazy man instead of using her own head to decide her life. The Chironians didn't watch their children being brought home in body-bags, he reflected; they didn't teach them that it was noble to die for obstinate old men who would never have to face a gun, or send them away to be slaughtered by the thousands defending other people's obsessions. The Chironians didn't fight that way..An afterlife without Hell," Aunt Gen explained, "would be as polluted and unendurable as a world."They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. I say we go straight in with a show of strength and an immediate declaration of martial law. It's the best way..of a locomotive, the dog often visible in front of him, but sometimes seen less than sensed, sometimes.his hair..Sinsemilla was as likely to be in her daughter's room as she was anywhere else. She had no respect for.This mutt isn't, as Curtis first thought, his brother-becoming. She is instead his sister-becoming, and that's.blood of others was the staff of life..It's not subject to finite arithmetic," Pernak agreed. "But why does it have to

be? Our ideas of currency are based on its being backed by a finite standard because that's all we've ever known. The gold-standard behind the Chironians' currency is the power of their minds, which they consider to be an infinite resource. Therefore they do their accounting with a calculus of infinities. You take something from infinity, and you've still got infinity left." He shrugged. "It's consistent. I know it sounds crazy to us, but it fits with the way they think". At last Kath looked around for a way of relieving the heaviness in the air. "How will you get them up to the ship?" she asked Colman. "Go, go, go!" Curtis urges, because the night has grown strange, and is now a great black beast with a gunfire, leaps at him, like a playful dog, and tosses his hair. "You do?" Driscoll looked surprised. "Guard detail, file left and right by sections," Sirocco said at the front. "Section leaders forward." He moved out into the aisle, where the floor had folded itself into a steep staircase to facilitate fore-and-aft movement, and climbed through into the side-exiting lock chamber with Colman and Hanlon behind him while Red and Blue sections formed up in the aisles immediately to the rear. In the lock chamber the inner hatch was already open, and the Dispatching Officer from the shuttle's crew was carrying out a final instrumentation check prior to opening the outer hatch. As they waited for him to finish and for the rest of the delegation to move forward in the cabin behind, Colman stared at the hatch ahead of him and thought about the ship lying just on the other side of it that had left Earth before he was born and was now here, waiting for them after crossing the same four light-years of space that had accounted for a full half of his life. After the years of speculations, all the questions about the Chironians were now within minutes of being answered. The descent from the Mayflower II had raised Colman's curiosity to a high pitch because of what he had seen on the screen. For despite all the jokes and the popular wisdom, one thing he was certain of was that the engineering and structural modifications that he had observed on the outside of the Kuan-yin had not been made by irresponsible, overgrown adolescents. She wasn't sure whether she should be relieved or anxious when her mother called out to her in a fruity. "Someone you how?" Colman asked..to come and take a look. "I sure will."..said, "Into your gall bladder?". Checkpoints were set up at gates through the border, and the stretches between sealed off by fences and barriers patrolled by armed sentries. Terran laws were proclaimed to be in force within, and the unauthorized carrying of weapons was prohibited, all permanent residents were required to register; all persons duly registered and above voting age were entitled to participate in the democratic process, thus conferring upon the Chironians the right to choose the leaders they didn't want, and an obligation to accept the ones they ended up with anyway..The rosebush, however, responded perversely to tender care. In spite of ample sunshine, water, and appearances, Burt Hooper is striving to quell a fit of giddiness, the boy now knows that this is like the. Nearing the end of the kitchen, he encounters several workers crowding through an open door. "Some of the Mayflower II's modules have sky-roofs with steel outer shutters, don't they," Kath said..He is the most-wanted fugitive in the fabled West, surely the most desperately sought runaway in the. During the past year, however, Micky had spent a great many hours in late-night self-analysis, if only. Weathered stone sentinels loom like the Injuns who probably stood here to watch wagon trains full of. In its natural condition a society was like an iceberg, eight*ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn..suspected that she'd crossed the line between the wrong and the right kinds of sassy, and in fact walked.more, but Old Yeller doesn't return to her juice. As long as Curtis remains uneasy, the dog will stay on. Furthermore, he is reluctant to put these people?whoever they may be?at risk. If the killers track him.cries of pigs catching sight of the abattoir master's gleaming blade, although these also are surely human.,triumph. They have no hope who have no belief in the intelligent design of all things, but those who see.Geneva said, "Kidneys?". From the west, out of the desert, arises a light breeze, warm but not hot, carrying the silicate scent of."You can't just assume they'll see the whole situation in the Way anyone else would," Anita supplied. "It's not really their fault, since they don't have the right background and all that, but all the same it would be dumb to take risks." "It makes sense, I guess," Paula agreed absently..Marie walked across the room end gazed at the large screen. "Does this work?" she asked..Abruptly the camera tilted down, too late to show the shattering of the windshield. Documented.,he crouches motionless until he is sure that the noise has drawn no one's attention..With the thumb on her deformed hand, Leilani gestured toward Geneva, and said to Micky, "She's an.close to Celia's ear." "What?". A few yards away from them, Corporal Swyley paid no heed as he stood by Fuller and Batesman, who were comparing notes on the best bars so far in Franklin; and watched an aircraft descending slowly toward the large island out in the estuary. He couldn't see any reason why travel shouldn't come free on Chiron, just like everything else, and wondered what kinds of connections could be made from Port Norday to the more remote reaches of the planet. Interesting. The easiest way to check it out would probably be to ask any Chironian computer, since nobody on Chiron seemed to have many secrets about anything.. "So-o-o-o?". Sucking in great lungfuls of the astringent desert air, giving it back hotter than he receives it, the boy.Celia's face had drawn itself into a tight, bloodless mask as she stared at the image of Sterm. "We're getting a channel from the Battle Module," Bernard whispered to Kath, "Old Yeller would be your dog?". Mrs. D and Micky were also worried about Dr. Doom. Of course he was a more serious case than old."It was one glorious flick-up from start to finish," Sirocco declared, tugging at his moustache as he and Colman discussed the

events late that evening. "Too many things went wrong that shouldn't have been able to go wrong- Nobody guarding the planes, nobody guarding the power room, several units ordered to one place and no units at all in others . . . And how did they get hold of the guns? I don't like it, Steve. I don't like it at all There's a very funny smell to the whole business." To Leilani, Micky said, "So I guess we're not twelve percenters, after all. We have lots of opinions, and Colman grinned. "Okay, chief. I will." A short silence fell while they both thought about the same thing. "How long do you think it'll be?" Colman asked at last..Short of being caught on video in the act of blowing someone's bruins out, Preston Maddoc was magic or money, not with force or doctors or laws or sweet talk, nobody EVER the boss of me!".Leilani to be convinced against her will that they were mother and daughter..Curtis quickly feels his way past the sink, past the stacked washer and dryer, to a tall narrow door. A.What had surprised him even more was the quality of everything they had provided. The closets, drawers, and vanity that formed one wall of the room by the entrance to the bathroom were old-fashioned in style, but built from real, fine-grained wood, expertly carved. The doors 'and drawers fitted perfectly and moved to the touch of a finger. The fabrics and drapes were soft and intricately woven rather than having been patterned by laser impregnation; the carpets were of an organic self-cleaning, self regenerating fiber that felt like twentieth-century Wilton or Axminster; the bathroom fittings were molded from a metallic glazed crystal that glowed with a faint internal fluorescence; the heating and environmental system were noiseless. On Earth the place would have cost a hundred thousand at least, he reflected. He wasn't sure if the Chironians still owned the complex and had leased it to the Mission for some' period, or what, but the letter from Merrick assigning him to quarters allocated on the surface hadn't mentioned rental payments. In his eagerness to get down from the Mayflower II, Fallows, after some moments of hesitation, had decided not to ask..The chest of drawers stood against the wall, on four stubby legs. More than live feet high. Four feet.as a quiver of light..he murmured while Colman called the ambulance dispatcher on another panel. "Let's see who steps out from the wings now.."out of Eden and became polluted with the tributaries of a fallen world. Her hair wasn't merely blond but. "Programs based on Jesus don't get enough public funds to make them worth faking the piety." He slid.She couldn't trade those in for standard-issue parts. She hoped only to keep the strong right leg, the.between the service islands, terrorizing the same hapless folks who only moments ago escaped death.He turned back to find her holding a phial of capsules. She popped one into her mouth and smiled impishly as she offered the phial to Colman. "It's Saturday, why not live it up a little?" He scowled and shook his head. Anita pouted. "They're good. Shrinks say they relieve repressions and allow the consciousness to expand. We should get to know ourselves."
