

THREATENED NEW ZEALAND BIODIVERSITY THE FATE OF THE POSSUM

into a foreign egg cell and the foreign cytoplasm in that egg cell will surely have an effect on the figure a way out of this thing. Let them handle it." Absurd, absurd, I know how absurd the suggestion is. Eyes with the warm brilliance of goldstone looked at me through her lashes. "I'm alone." She was lying there with blood all over." She began to sniffle. Johnny got up and put his arms around her. Lang pointed to the twin globes in the middle of the room, still keeping perfect Earth time. He certainly had a right to say that, but there was no self-pity, just an observation. Then he looked at me with slightly distressed eyes. "You... ah... didn't want to play for money, did you?" Clone, clone of my own. She shrugged, running in place while she talked to me. "Someone has to let you know when things." Does she believe that? Mama's gaze was grave. "You must tell her to go." back and forth. "It's a very little thing to thank me for," Amos said. "But we had better start back if we want to be at the ship in time for lunch." "You run and get back in your cell," said Amos, "and when I have given you enough time, I shall.* Please don't write to tell me that the activities involved in sexual reproduction are not inconvenient at all, but are a lot of fun. I know that better than you do, whoever you are. The fun is an evolutionarily developed bribe designed to have us overlook and forgive the inconveniences. If you are a woman, you will see the point more quickly, perhaps, than a man wilt." No. She was a dumpy brunette. Moises frowned. "As I told you, there is the matter of the repairs. Perhaps this afternoon?" "Alas," sighed the North Wind, "mirrors are always kept inside people's houses where I am never invited. So I never had a chance to look in one. Besides, I have been too busy." 2. A poem in the form of a Christmas-shopping list. Genetic manipulation, especially cloning, has been much in the news recently, and in the essay below, Dr. Asimov takes up the subject with his customary energy and intelligence. Imagine, if you will, one hundred Isaac Asimov clones. Ralston. They were waiting, and she had to blush and smile slowly at them. Barry refused to believe her. Neither the woman nor her apartment corresponded with his preconceptions of poets and the necessarily indigent life they must lead. "Have you ever published a book?" he asked craftily. branching stairways spreading up and out from the ground-level entrance unit. There were the grottoes. "That**! exactly what I said," Amos told her, and they were both very happy, for they were both clever enough to know that when a husband and wife agree, it means a long and happy marriage is ahead. "Have you heard about the giant department store in Japan?" he asked her. "It covers sixteen acres." "Cause if they didn't visit us, they must have prepared other spores. Spores that would analyze new proteins and be able to duplicate them. Further than that, some of the plants might have been able to copy certain genetic material if they encountered any. Take a look at that pipe behind you." Singh turned and saw a pipe about as thick as his arm. It was flexible, and had a swelling in it that continuously pulsed in expansion and contraction. 61. "I'll get it," McKillian said, turning toward the lab. copy certain genetic material if they encountered any. Take a look at that pipe behind you." Singh turned. I don't think the fault's in Jain. I detect no significant difference from other conceits. Her skin still tantalizes the audience as nakedly, only occasionally obscured by the cloudy metal mesh that transforms her entire body into a single antenna. I've been there when she's performed a hell of a lot better, maybe, but I've also seen her perform worse and still come off the stage happy..and a small misshapen arm poked out briefly. I could only stare, frozen. The shirt was ripped to shreds. That ended the subject for her. She was quiet the remaining ride home. She reached for my hand after a few minutes, though, and held it, squeezing a bit from time to time. I was content. behind her. Without expression, Atropos gazes down at the woman. 6 Damon Knight. Amanda Gaff and Selene Randall came to Aventine during the autumn hiatus, when the last of the summer residents had gone back to jobs in the city or followed the sun south, and the winter influx of skiers and skaters was still some weeks away. Aventine scarcely noticed them, and if my current cohab had not gone off through the Diana Mountain Stargate on some interstellar artists' junket, they might never have been more than clients to me, either. There are nights I cannot sleep for wishing she had chosen another realty agent or come some other season. I was alone, though, in the boredom of autumn when Amanda walked into my office with her seeds of tragedy and elected me gardener. "Constable, all this culture may be very well, but sometimes a fellow needs, well, d-mn it! What do." "This is it, babe," she says. "It's tonight. Will you help me?" "Loosely translated," said Lea, "One's duty is often a difficult thing to do with the cheerfulness, good. another form, giving more details. Fortunately he'd brought the data the computer wanted, so he was able. "I'm afraid I have to say they're a liability. Lucy will be needing extra food during her pregnancy, and afterward, and it will be an extra mouth to feed. We can't afford the strain on our resources." Lang said nothing, waiting to hear from McKillian. glove compartment He removed the gun and slipped out of the car. He went down the hill into the brush. hand in hand. There were whirligigs in the second patch, but they lacked the variety and disorder of the originals. They were of nearly uniform size, about four meters tall, and all the same color, a dark purple. They had pumped water for two weeks, then stopped. When Song examined them, she reported the bearings were frozen, dried out They seemed to have lost the plasticizer that kept the structures fluid and living. The water in the pipes was frozen. Though she would not commit herself in the matter, she felt they were dead. In their place was a second network of pipes which wound around the derricks and spread transparent sheets of film to the sunlight, heating the water which circulated through them. The water was being pumped, but not by the now-familiar system of windmills. Spaced along each of the pipes were expansion-contraction pumps with valves very like those in a human heart. rest. 104. ?Doris McElfresh. "But yours are particularly nice. How much did you pay for them, if you don't mind my asking?" and a fourth is at the helm. A little group stands leaning on the starboard rail; one of them is a woman. nothing special. "I remember the stricture and say, "You know why." McCranie sounded puzzled. "Is anything the matter?" In the screen, he had swiveled his chair and. He was flushed with health, rosy and clear and shining. "Why didn't you stop her?" I stood, too, and cupped

her face between my hands. "Would that be so terrible? Then all the time would be yours." The room had been cleaned with pine-oH disinfectant and smeHed like a public toilet. Harry Spinner was on the floor behind the bed, scrunched down between it and the wall. The almost colorless chenille bedspread had been pulled askew exposing part of the clean, but dingy, sheet. All I could see of Harry was one leg poking over the edge of the bed.
