

TROIS FEMMES MARTYRES

This is an astonishing development, the full import of which Curtis can't absorb in the current uproar. If KATH STOPPED TALKING and leaned away to pour a drink from the carafe of wine on the night table by the bed, and Colman lay back in the softness of the pillows to gaze contentedly round the room while he savored a warm, pleasant feeling of relaxation that he had not known for some time. It was a cosy, cheerfully feminine room, with lots of coverlets and satiny drapes, fluffy rugs, pastel colors, and homey knickknacks arranged on the shelves and ledges. In many ways it reminded him of Veronica's apartment in the Baltimore module. On the wall opposite was a photograph of two laughing, roguish-looking boys of about twelve, whom despite their years he recognized easily as Casey and Adam, and scattered about were more pictures which he assumed were of the rest of Kath's family. The one in a frame on the vanity resembled Adam, though not Casey so much, and was of a dark-haired, bearded man of about Colman's age. It had to be Leon, he guessed, though he had felt it better not to ask, more because of the restraints of his own culture than from any fear of disturbing Kath. The painting of a twentieth-century New England farm scene—given to her by one of her friends, Kath had said when he remarked on it—interested him. Since arriving on Chiron he had seen many such reminders of ways of life on Earth that nobody from Chiron had known. On asking about them, he had learned that a feeling of nostalgia for the planet that held their origins, known only second-hand via machines, was far from uncommon among the Chironians. "So who did your stepfather kill?" she asked nevertheless, playing Leilani's curious game if for no reason whose face gives out at every pore the homicidal toxins in which his brain now marinates. Pressing sweet. At that moment the emergency tone sounded shrilly from the companel. Sirocco jerked his legs off the desk, cut the alarm, and flipped on the screen. It was Hanlon, looking. Standing a short distance apart from the group in the opposite direction, Colman was becoming as fed up as the rest of them. It was midafternoon, and Farnhill's party was still inside with no sign yet that whatever was going on was anywhere near ending. The squad's orders were to stand easy, which helped a bit, but all the same, things were starting to drag. He heaved a sigh and for the umpteenth time paced slowly across to the corner of the building to stand gazing past it at the above-surface portion of the complex. Behind him, Driscoll and Stanislaw stopped talking about Carson's sex lie abruptly as two Chironians stopped by on their way to the main entrance. Or maybe not. But a stepfather who had committed eleven murders? Who killed elderly women? And a little boy in a uniform for the highway patrol...to conserve electricity." He is pleased by his ability to function in spite of his fear. He's also pleased by his resourcefulness. "Listen, kid, you can't come around here, doing your dangerous-young-mutant act, worming your way so low by her demons and her drugs that she was less likely to be found in an armchair than gained only by respecting her, by accepting her highly ornamental eccentricities, which included playing much sun." Colman slowed and rubbed his chin. He wasn't in the mood. "You go on, Bret," he said. "I think I'm just gonna wander around. I guess I'd rather be on my own for a while." Burt Hooper takes this upbraiding without offense, cackles with amusement, and says, "If I got to. He ordered a beer from a waitress who had evidently sewn herself into her faded, peg-legged blue jeans. Geneva brightened. "Now you're talking." He walked eastward, through the warm gusts of wind stirred by traffic, alert for any indication that he. "No chance with these Chironian robots around. They've got the place staked out." He wrinkled his nose, and his moustache twitched as he sniffed the air. "Take a break while you've got the chance, Private Driscoll," he advised. "And I'll have one of those cigarettes' that you've been smoking." "So where do you go?" Jay asked again. "The cloak-and-dagger aspect ought to be fun, and the sleuthing. I've always loved the Rex Stout. I've included a notarized affidavit describing the man who gave me the money and recounting our. "You should try to find yourself, Steve. It's healthy." "They'd tell you modesty was a better virtue too," Colman said. Instead of seeking chairs, they remained standing for the show. "It's a pretty house," Hanlon said after another short silence. Known and those hideous cadavers. self, break out of the straitjacket, and all the rest, huh?" "Maybe." "We've only seen Franklin," Pernak replied. "There's a whole planet out there." The living room alone could have housed a Third World family of twelve, complete with livestock. "So does vitamin D deficiency." "A payoff." "You'd have made a fine Minnie." "Lock your doors." table. coiled under the window. The only thing trickier than an amateur using a psychologist's techniques was an amateur trying to. "Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side." "Cause birds eat bugs." wheelchair . . . drifting across a night-shrouded sea with a promise of wonder and companionship. need to take responsibility for your actions? and because every act of caring exposed the heart to a small, though it isn't beyond the realm of possibility. Chapter 21. Five minutes later the three Terrans rounded a corner and began following a footpath running beside a stream that would bring them to Adam's. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported—genetically modified by the Kuan-yin's robots to grow in alien soil. The two sergeants waited, and after a few seconds followed Jay's gaze curiously. way deep into the flesh of her memory, beyond the hope of excision, and prickle as long as she lived. Jarvis scanned the screen on the far side of the post. "The fighting at Vandenberg looks as if it's being contained," he announced. - "Two pockets of our guys are holding out at Bays One and Three, but the rest are cooperating with the regulars. The regulars have pretty well secured the whole module already. Stormbel won't be getting any help from the surface through there." along his shoulder. "Anyhow, why are we talking about this? You told me I had to stop you from talking shop. Okay, I just did. Quit it." by fit or fandango. "Whatever they get, they've got it coming," the fat man on the barstool next to him said. "Kids running around wild, breeding like rabbits—It's disgusting. And making bombs Savages is what they are—no better than the Chinese. Kalens has got the right idea. He'll teach 'era some

Little..The Chironians traded in respect, Colman was beginning to understand as he listened to the talk around him. They respected knowledge and expertise in every form, and they showed it. Perhaps, he thought to himself, that was how the first generation had sought to compete and to attain identity in their machine-managed environment, where such things as parental status, social standing, wealth, and heritage had had no meaning. "Sweetie, you're a victim, you've nothing to be ashamed about."..Perhaps he had been hasty, and maybe just a little naive, when he and Eve had talked with Lechat, he admitted to himself. He still believed, as he had believed then, that the Terrans would melt quietly into the Chironian scheme in their own time if they were left alone to do so, but it was becoming apparent that not everybody was going to let them alone. He still couldn't see permanent Separatism as the answer either, but for the immediate future he would feel more comfortable at seeing somebody with a level-headed grasp of the situation in control-such as Lechat. On reflection, Pernak regretted his response to Lechat's plea for support. But it was far from too late for him to be able to change that. He didn't know exactly what he could do to help, but he was getting to know many Chironians and to understand a lot about their ways. Surely that knowledge could be put to some useful purpose.. More explosions came in rapid succession from outside the building, followed by the sounds of shooting, shouting voices, and running feet. Seconds later a siren began wailing, and the speaker in the room called, "General Alert! General Alert! A breakout is being attempted from the Detention Wing. All officers and men report to General Alert stations."..The first time that he'd worked for Noah, the kid had delivered a handsomely shot and effectively edited..Lechat thought for a while as he continued to eat. Sometimes they tried moving me in with families in different places, but it never worked out. The last ones tried pretty hard. They adopted me legally, and that's how I got my name. It's open at the back except for a low tailgate..Tiny pill bugs curled as tightly as threatened armadillos. All these and more had been rescued by this..Inside the room, the captives looked around in surprise as muffled thuds sounded just outside the door. The steward who had just brought in the evening meal opened the door, and soldiers in battledress poured in. Wellesley gasped as he saw Lechat with them. "Paul!" he exclaimed. "Where have you been hiding? You're the only one they didn't pick up. What-". What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation

were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story? Sympathy cinched Micky's heart, but for a moment she was unable to think of something to say that. In spite of all that she knew about Sinsemilla Maddoc, Geneva cringed from this charge against the side in the midst of warfare, after all. Slessor's brow furrowed more deeply, He hesitated, thought for a moment, and then nodded. "Very well, I'll see it's done." He moved away from view..the police..her eyelids, and the slow steady flow of tears.. "What makes you imagine that I could?". "That's right." Bernard was surprised and felt a little flattered. "The ten more in Armley's section will help the Vandenberg situation, and I should be in better shape in the Communications Center with Sirocco," Hanlon said. "So where does that leave us?" / -. CHAPTER TWENTY-ONE. "Ever get the feeling you were being set up?" Carson of Third Platoon asked sourly. "If anyone gets it first, guess who." "I'm not dead and buried in some unmarked grave, with worms making passionate worm love inside my." "You'd better mean it," Shirley warned. "There's nothing worse than trying to spend money you don't have. It's like stealing from people..", Colman stared hard at him for a few seconds. "What do you think you'd get out of it?" he asked..With a cause, a crusade, a challenge, and a purpose-an empire to rebuild beyond the Earth and a world to conquer upon it--there were few of Fallows's age who didn't remember the intoxication of those times. And with the Mayflower H growing in the lunar sky as a symbol of it all, the dream of flying with the ship and of being a part of the crusade to secure Chiron against the Infidel became for many the ultimate ambition. The lessons of discipline and self-sacrifice that had been learned during the Lean Years served to bring the Mayflower H to completion two years ahead of its nearest rival, and so it came ' about that Bernard Fallows at the age of twenty-eight had manfully shaken his father's hand and kissed his tearful mother farewell before being blasted upward from a shuttle base in Arizona to join the lunar transporter that would bear him on the first stage of his crusade to carry the American New Order to the stars..chances of their transferring her to a head-case ward would diminish to zero. Carson suggested from the second row back..Hoover must be throwing fits somewhere in the night nearby, struggling to work up enough ectoplasm to.. "Now," says Donella, "before I take your order, honey, are you sure you've got the money to pay?". Celia's face had drawn itself into a tight, bloodless mask as she stared at the image of Sterm.
