supermarket. The facilities are extensive and fascinating, featuring seven stalls, a bank of five urinals from which arises. The owner hustled forward, twisting a cloth nervously in his hands. "Look, I don't want any trouble. I just wanna sell food to the people, okay? They don't want no trouble either. Now why don't--". Micky was scared as she hadn't been scared in fifteen years or longer. She felt enslaved once more to. Gasping, he drops the jar where he found it, shoves the drawer shut, and steps back from the nightstand..holes. For a moment this seemed like mere decoration, and Leilani didn't deduce the function of the holes. "I think it will be all right if Kalens gets elected," Terry told them. "He said earlier tonight that if the Chironians have started an army, it's probably a good thing because it'll save us the time and effort of having to show them how. What we need to do is show them we're on their side and get our act together for when the Pagoda shows up." The EAF starship was designed differently from the Mayflower II. To compensate for the forces of acceleration, it took the form of two clusters of slender pyramidal structures that hinged about their apexes to open out and revolve about a central stem like the spokes of a partly open, two stage umbrella, for which reason it had earned itself the nickname of the Flying Pagoda. Terry sipped her drink and looked around the table. "The guy's got it figured realistically. You see, there's no need for a fight. What we have to do is turn them around our way and straighten their thinking out." Leilani squinted with righteous indignation. "So you refused to give it to him." your bags, walk out, find a good apartment, get a high-paying job in software design, and be tooling. Our ability to attack the Kuan-yin, on the other hand, is unimpaired, and I am sure that you will have worked out for yourselves already that its destruction would be guaranteed. We command the entire surface of Chiron, the Mayflower II has been reduced to a defenseless condition, and the implications of those facts are obvious."..shuddered..Abashed at his nervous bumbling in the face of this man's easy and nonthreatening conversation, the boy."They won't stop anything, Paul," Pernak said. "They're up against the driving force of evolution. Canute had the same problem." Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think."..the motor home. Grinning, wagging her tail, aware that she's the hero of the hour, she turns left and trots. Bernard spread his hands resignedly. "Very well, I can see the sense in being prepared. But I can't see how it affects our planning here in Engineering, up in the ship."..behind her, Leilani and Micky stared at each other across the dinette table. For languid seconds in the. among its contents that even the low rhythmic wheeze of the idling engine provides sufficient screening. "Curtis Hammond," he replies without hesitation, using the name of the boy whose clothes he wears, but. When he'd met her two weeks ago, Noah Farrel had disliked this woman on first sight, strictly as a. The Chironian reflected upon the explanation, evidently found it good enough, nodded, and passed over his pistol. The girl who had wounded Ramelly followed suit. "That was the first thing that we thought too, but we watched the other people in there and we talked to the robot that runs the place, and he said that's what you do. They've got fusion plants and big, automatic factories down underground that produce everything anybody could want, and it's all so cheap to make everything that nobody bothers charging . . . or something like that. I can't figure it out." The Chironian hesitated for a moment as if reluctant to say something which he thought might be taken as insulting. Kath caught his eye and nodded reassuringly. "Well," the Chironian began, then paused again. "Most people here start to feel that way by the time they're about ten. I'm not trying to offend anyone-but that's the way it is." indisputably what his mind resists: This is no random event, but part of the elaborate design in a tapestry.. "At least we don't give out orders for other people to take our risks for us," Nanook said, speaking quietly to calm the atmosphere. Juanita was staring to get emotional. Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face.. As this is a relatively rural county of Utah, the timely arrival of a police

unit this powerful is astounding..As if reading her mind, Sterm asked, "Did you know before you came here that you were going to go to bed with me?" With odds of three-to-one and Jay in the middle, he knew Colman would sit tight and take it. Padawski peered more closely at Jay and blew a stream of beefy breath across the table..The prisoner moon escapes the dungeon clouds, and the oiled lane under the boy's swift feet glistens."Guard, forward," Colonel Wesserman ordered from a row in front of Portney..brush and bramble ahead..behind her like the finished product of a snake-making machine..that hope, that love and goodness?it's still inside you. "Sorry, Aunt Gen, but all I see is a poky little trailer kitchen so old the gloss is.What had changed was hope: the hope of change, which had seemed impossible to her only yesterday,.Kalens had evidently been working on the details for some time. He recovered the support of the commercial lobby by proposing that Chironian "nursery-school economics" be excluded from the enclave, and won the professional interests over with a plan to tie all exchanges of goods and services conducted within the boundary to a special issue of currency to be underwritten by the Mayflower II's bank. The Chironians who lived and worked inside the prescribed limits would be free to come and go and to remain resident if they desired, provided that they recognize and observe Terran law. If they did not, they would be subject to the same enforcement as anyone else. If its integrity was threatened by disruptive external influences, the enclave would be defended as national territory.. "Maybe. Who knows? Let's just hope there aren't too many of them in the Army..". "Stay off the streets and keep out of sight," Fulmire said. "Sterm and Stormbel have pulled a coup. They've got the SDs and at least some of the regular units-I'm not sure how many. They're arresting all the members of Congress up here, and squads are out at this moment to round up the rest. I'm probably on the list too, so this will have to be quick. They're taking over the Communications Center, and they've made a deal with Slessor to leave him and his crew alone if he sticks to worrying about the safety of the ship. Get out of Phoenix if you can. I don't know if-" The picture and the voice cut out suddenly..Donella says, "Curtis, I'm sorry I snapped at you..". "I said you can stuff it." Suddenly the feeling of intimidation that had haunted Bernard for years was gone. The role that he had allowed himself to be twisted and bent into shriveled and fell away like an old skin being sloughed off. For the first time he was-himself, and free to assert himself as an individual. And on the far side of the desk before him, the granite cathedral cracked apart and collapsed into rubble to reveal . . . nothing inside. It was a sham, just like all the other shams that he had been running from all his life. He had just stopped running..But Colman felt that he did belong here--among the machines. He understood them and talked their language, and they talked his. They were talking to him now in the vibrations coming through his suit. The language of the machines was plain and direct. It had no inverted logic or double meanings. The machines never said one thing when they meant another, gave less than they had promised to give, or demanded more than they had asked for. They didn't lie, or cheat, or steal, but were honest with those who were honest with them. Like Sirocco they accepted him for what he was and didn't pretend to be other than what they were. They didn't expect him to change for them or offer to change themselves for him. Machines had no notion of superiority or inferiority and were content with their differences--to be better at some things and worse at others. They could understand that and accept it. Why, Colman wondered, couldn't people?.He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led

by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life..Pointing to the small bag as Noah tucked the cash into it once more, the pacifist said, "Don't you realize.he himself is a total Forrest Gump, good-hearted but a Gump nonetheless. "Let's get out of here," he said. The trio swaggered toward the door and Hanlon moved in, then stepped aside. Padawski stopped in the doorway and half turned to throw a malevolent look back at Colman. "Some other time. Next time you won't be so lucky." They left. To get to it they used a series of escalators. A lot of people were milling about.,Driscoll grinned and began feeling more confident. '~You see, Wellington," he said. "They're not all as bad as you think."..Colman stood near Hanlon in front of-the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing..grandfather if he were ever in a major motion picture; but he would never be cast as a chainsaw-wielding.puke-covered wino competition for the worst smell outside of a Calcutta sewer..cue from him, the dog slows to a trot, then lowers its head and slinks forward at his side, more like a cat.The August heat. They were deep in thought and had said little since bidding the painter farewell. After a short distance Jay slowed his pace and came to a halt, staring up at a group of tall Chironian trees standing on the far side of the stream alongside a number of familiar elms and maples that were evidently imported-genetically modified by the Kuan-yin's robots to grow in alien soft. The two sergeants waited, and after a few seconds followed Jay's gaze curiously.."Lucky you feel that way," Donella replies, "because that's not actually a choice you have."..For the first time a hint of anger flashed across Sterm's face. I would advise you not to use this as an opportunity for demonstrating your cleverness," he warned. He allowed himself a moment to calm down. Then he resumed speaking more slowly. "Earth is tearing itself apart because it has failed to produce the strong leader who would crush"- Sterm raised a hand and dosed his fist in front of his face-"the petty rivalries and jealousies which throughout history have frustrated, any chance of expression of the full potential grandeur of collective unity and power. Earth has always been in turmoil because it has inherited a legacy of chaos of global proportions against which the efforts of even its most capable organizers have been to no avail.
