"Sure. Why else?" "I'm not sure," Kalens replied distantly. Trying to elucidate Sterm's motives is akin to peeling an onion. But when you think it through, if there's no resistance, we win automatically, and if there is, then the Chironians will be forced to make the first moves, which gives us both a free hand to respond and a clear-cut justification that will satisfy our own people . . . which' is doubly important with the elections coming up. So really you have to agree, John, the scheme does have considerable merit."..Pernak waited for a moment longer, then put down his fork and leaned across the table. "On Chiron, wealth is competence!" he said. "Haven't you noticed--they work hard, and whatever they do, they do as well as they know how--and they try to get better all the time. It doesn't matter so much what they do as long as it's good. And everybody appreciates it. That's their currency--recognition, as you said . . . recognition of competence." He shrugged and spread his hands. "And it makes a lot of sense. You just told us that's what everyone wants anyway. Well, Chironians pay it direct instead of indirectly through symbols. Why make life complicated?"..until she saw what had come in the container..burnt umber, with a filigree of chrome-yellow. Sinuous body, flat head, glittering black eyes, and a." "Did anybody see the news today? Some scientist or other thinks the Chironians could be building bombs. There was an interview with Kalens Wo. Earlier, sadness had cast a gray shadow..gunfire?Curtis hears it for sure this time?erupts, muffled but unmistakable, from the depths of the..Jay sat at an empty booth while Colman collected two coffees from the counter, then inserted' his Army pay-card into a slot. In a lot of ways lay reminded Colman of himself when he was a lot younger. Colman had acquired his name from a professional couple who adopted him when he was eleven to provide company for their own son, Don, who was two years older. They hadn't wanted to disrupt their careers by having another child of their own. Colman's stepfather was a thermodynamics engineer involved with heat exchangers in magnetohydrodynamics systems, which accounted for Colman's early interest in technology. Although the Colmans had done their best to treat both boys equally, Steve resented Don's basic schooling and was jealous when Don went to college to study engineering, even though he himself had then been too young W do the 'same. The rebelliousness that" had contributed W Steve's being placed in the home for wayward adolescents from which he had been adopted reappeared, resulting in his giving the couple some hard times, which upon reflection he felt bad about. For some reason that Steve didn't understand, he felt that if he could help Jay realize his potential and use the opportunities he had, it would make up for all that. Why, he didn't know, because nothing he did now could make any difference to the Colmans, who were probably old and gray somewhere, but he felt he owed it to them. People's minds worked like that. Minds could be very strange..Wendy sighed. "We all have our plights and pickles."..exception, and by gratitude that the worst of his own imperfections were within his ability to make right if..Wellesley concluded his formal speech and stood looking around the hall for a

moment to allow a lighter mood to settle. In the last few days some of the color had returned to his face, his posture had become more upright and at ease, and his frame seemed to have shed a burden of years. The corners of his mouth twitched upward, and those nearest the front caught a hint of the elusive, almost mischievous twinkle lighting his eyes. Colman kept a poker face. "What made him think that?" usually had one whether or not she enjoyed it. Lechat looked thoughtfully at his plate while he finished chewing a mouthful of food. "Does it do-that a lot?" Colman asked from his chair, which had been cleared of a pile of books and some stuffed birds to make room for him. when they had arrived an hour or so earlier. The Mayflower II had the general form of a Wheel mounted near the thin end of a roughly cone-shaped axle, which was known as the Spindle and extended for over six miles from the base of the magnetic ram scoop funnel at its nose to the enormous parabolic reaction dish forming its tail. Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back. you're thinking about Ashley Judd or Sharon Stone, or maybe Pam Grier. "In the years since, the instrumentation module had sprouted a collection of ancillary structures which had doubled its size, the original fuel tanks near the tail had vanished to be replaced, apparently, by a bundle of huge metal bottles mounted around the central portion of the connecting boom, and a new assembly of gigantic windings surrounding a tubular housing now formed the tail, culminating in a parabolic reaction dish reminiscent of the Mayflower H's main drive, though much smaller because of the Kuan-yin's reduced scale. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems. IN THE ARMCHAIR, Noah Farrel talked past the point where he bothered to listen to himself. "You've got your father's name," Geneva said hopefully. "If he could be found . . ." "How many of you are there?" Lesley asked. Leilani didn't have a fearsome capacity for violence, maybe not any. She never fantasized about being a treasure, Curtis scuttles past the cook, bound for freedom and a makeshift dinner, surprised by the arrival of smoldering summer-evening light, behind the smoky reflections of the layered kitchen shadows, great resources and urgency across the West. No compromise was possible; he dealt only in unconditional surrender, and she knew that those were the terms he was offering for, her survival. Tweaked by puzzlement, her classic features had a pixie charm. "Excuse me?" Celia set her glass on the table and found that she needed a moment to reorient her thoughts, even though she had known this was coming. "I'm concerned over this latest threat to evict Chironians from Phoenix. It's not the bluff that many people think. Howard is serious." Geneva brightened. "Now you're talking." Kath closed her eyes gratefully for a moment, and then turned to speak to Veronica, Adam, Casey, and Barbara, who were off-screen. "They've found Steve, He's all right." the pavement, the human Good & Plenty slammed the hammer against the hood of the car. His dark-adapted eyes sting briefly from the glare. The matron didn't give Veronica a second glance when she came out of the bathroom with Celia's bag on one hand. Room and facilities up there were limited, and the machines moved the first batches down as soon as they got the base fixed up." "Wha-huh? ... Who?" Colman rolled over and winced at the glare as the blanket was pulled away from his face. Stern was not a person to waste his time and energy with futile melodramatics and accusations, but Stormbel knew full well that he wouldn't forget-and neither would Stormbel forget. The Chironians were behind it, he was. "Photographs," Micky said. "Pictures of you and Luki. That would be proof he wasn't just your end of a hangman's noose. Leilani looked away almost at once, and yet on the strength of a single. Although conceding the game to Death, she remained determined not to let Death also take sweet. In this deep quiet, Micky gradually became aware of the whispery sputter-sizzle of burning candle. Stern shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? "No doubt," Noah said, "they were once troubled youths rescued from a life of mischief, and tumbler with two shots of anesthesia, over ice. She promised herself at least a second round of the same. At that moment the emergency tone sounded shrilly from the companel. Sirocco jerked his legs off the desk, cut the alarm, and flipped on the screen, It was Hanlon, looking. The door of one of the. Corporal Swley wasn't saying anything, which was significant because Swley was usually a pretty good judge of what was what. His silence meant that he didn't agree with what was being said. When Swley agreed with something, he said he didn't agree. When he really didn't agree, he said nothing. He never said he agreed with anything. When he had decided that he felt fine after the dietitian discovered the standing order for spinach and fish, the Medical Officer hadn't been able to accuse him of faking anything because Swley had never agreed with anybody that he was sick; all he'd said was that he had stomach cramps. The M.O. had diagnosed that anybody with stomach cramps on his own time had to be sick. Swley hadn't. In fact, Swley had disagreed, which should have been obvious because he hadn't said anything.. "Technically you're right," Kath agreed. She raised her head to look at the pictures of her children on the wall with a faraway look in her eyes. "They might be scattered all over the planet, and the way they live might be a little strange compared to what you're used to, but it's a happy family in its own way," she murmured. "But it's still not really the same. It doesn't really feel as if any part of it has any link to anything that happened before fifty years ago. Don't you think it's ... oh, I don't know, kind of a shame somehow?" "In some ways it seems almost criminal to take them, but..." she sighed, "I'm sure they'd just be wasted otherwise. After all, those people are obviously savages and! quite incapable of appreciating the true value of anything." Celia's throat tightened, but she managed to remain quiet. Mrs. Crayford fussed with her pile of boxes. "Oh, dear, I wonder if I should leave some of them here after all and have them picked up later. I'm not at all sure we can carry them the rest of the way with just the two of us." .As a youth he had daydreamed about becoming an entertainer--a singer, or a comic, maybe--but he couldn't sing and he couldn't tell jokes, and somehow after his parents died within two years of each other halfway through the voyage, he had ended up in the Army. So now, though he still couldn't sing a note or tell a joke right, he knew just how to use an M32 to demolish a small building from two thousand yards, could operate a battlefield compack blindfolded, and was an expert at deactivating optically triggered anti-intruder personnel mines.. "Oh, I've heard much worse at our house," Leilani assured them. "Old Sinsemilla fancies herself an artist." "Well, I know he shot me, of course, but I have no memory of it. I remember him shooting Vernon, and." "Thank you," Merrick said, pouncing on the opportunity to conclude. "I agree with and endorse your assessment. Very good, Fallows. Enjoy your leave." Merrick turned to one side and began tapping something into the touchboard below the screens.. why are you painting it?" he asked. "Because it needs painting." Leilani to say, "Old Sinsemilla," and that drew Micky to the open back door of the trailer.. concentrates, and distillations filled a glittery collection of vials and charming ornate bottles fitted in two. Stern held up- a hand. "Yes, yes, we have been through all that." The wheel, or Ring, was eighteen-plus miles in circumference and sectionalized into sixteen discrete structural modules joined together at ball pivots. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage.. The section assigned to the Columbia District split up into small groups that came out of the Ring transit tube at different places inside the module and at staggered times. Colman, Hanlon, and Driscoll got off with Lechat, who was dressed to obscure his appearance since he was presumably still high on Stern's wanted list. They rendezvoused with Carson and three others a few minutes later, then they headed via a roundabout route for the Fran?oise restaurant, which was situated on a public level immediately below the Government Center complex.. Although Casey and Barbara remained outwardly cordial and polite, they were making no attempt to disguise the fact that they felt the same way. Colman realized that for the first time he was seeing Chironians with the gloves off. All the warmth, exuberance, and tolerance that had gone before had been genuine enough, but beneath it all lay more deeply cherished values which came first, no matter who made the pleas. On that, there could be no concessions.. "Hey, you. Stop."

The major in command of the four SD troopers sent to scout out the center of Canaveral City --a residential and commercial suburb situated outside the base and merging into one side of Franklin--addressed the Chironian whom they had followed from the restaurant a few yards back around the corner. He was well-dressed, in his midthirties, and carrying an attaché case. The Chironian ignored them and kept walking. Whereupon the major marched ahead to plant himself firmly in the man's path. The Chironian walked round him and eventually halted when the troopers formed themselves into an impassable barrier on three sides. "You're coming to talk to the ambassador," the major informed him..attempt to add some dark glamour to the image of Ms. Leilani Klonk, flamboyant young mutant
