He was genuinely surprised. "You didn't take that crack seriously, did you? I might as well admit it. It was intentional, like that cattle prod you mentioned. You looked like you needed a kick in the ass." One feeling the oppression, she went on, more strongly. "I think if I go another day like yesterday and the... A highly depressing idea, but he did not on that account roll out the console to select a remedy from the menu. He knew from long experience that whatever could make him palpably happier was also liable to send him into a state of fugue in which conversation in the linear sense became next to impossible. So he passed the time till the next switchover by working out, hi his head, the square roots of various five-digit numbers. Then, when he had a solution, he'd check it on his calculator. He'd got five right answers when his chair reared up, god bless it, and bore him off toward . . . Would it be the couple chained, wrist to wrist, on the blue settee? No, at the last moment, his chair veered left and settled down in front of an unoccupied bent-wood rocker. A sign in the seat of the rocker said: "I feel a little sick. Back in five minutes." rest of us mortals. And I was feeling my resolve begin to crumble. It was hard to believe this beguiling kid. It was late when I finally got home. All evening I'd dreaded having to face Debbie with the bad news. But when I looked in the bedroom, she was sound asleep. "He always has an alibi, huh?" a zero. I backed away, throwing my arms up to protect my head. Amanda might not be athletic, but she had all her released emotion and Selene's sinewy gymnastic strength behind that swing. What probably saved my life was that she did not have Selene's conscious coordination. The poker only brushed my forearm before smashing into the stone of the fireplace. By day, in his deer shape, Brother Hart would go out and forage on green grass and budlings while his sister remained at home. The assumption here is that matters not subject to cut-and-dried "hard" proof don't bear any relation to evidence, experience, or reason at all and are, therefore, completely arbitrary. There is considerable indirect evidence one can bring against this view. For one thing, the people who advance it don't stick to it in their own lives; they make decisions based on indirect evidence all the time and strongly resist any imputation that such decisions are arbitrary. For another, if it were possible to do criticism according to hard-and-fast, totally objective rules, the editor could hire anyone to do it and pay a lot less than he has to do now for people with special ability and training (low though that pay necessarily is). It's true that the apparatus by which critics judge books is subjective in the sense of being inside the critic and not outside, unique, and based on the intangibles of training, talent, and experience. But that doesn't per se make it arbitrary. What can make it seem arbitrary is that the whole preliminary process of judgment, if you trace it through all its stages, is coextensive with the critic's entire education. So critics tend to suppress it in reviews (with time and training most of it becomes automatic, anyway). Besides, much critical thinking consists in gestalt thinking, or the recognition of patterns, which does occur instantaneously in the critic's head, although without memory, experience, and the constant checking of novel objects against templates-in-the-head (which are constantly being revised in the light of new experience), it could not

occur at all.* Hence angry readers can make the objection above, or add: "India," Moises said, pronouncing the word with all the contempt of one in whose veins ran a ten.
